VERSION DESCRIPTION

v1.0: Full edited dataset, original version for internal DPD use.

PRODUCTION DATE

2008-07-18

Overview

ABSTRACT

This survey provides information on household income and expenditure to be able to measure the levels and changes in the living condition of the people and to observe the consumption patterns .

Key objectives of the survey

- To identify the income patterns in Urban, Rural and Estate Sectors & provinces.
- To identify the income patterns by income levels.
- Average consumption of food items and non food items
- Expenditure patterns by sector and by differnt income levels.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Household, Individuals

Scope

NOTES

The scope of HIES 1995-1996 includes the following key sections:-

- 1). Demographic characteristics
- 2). Income
- 3). Expenditure

Identification and demographic Information

- Address
- Province
- District

- D.S. Division
- Name of MC/UC
- G. N. Division
- Name of Village
- Name of Estate
- Primary Sample Unit Number
- Serial Number of Housing Unit
- Survey Month
- Number of households
- Name of the Head of the household
- Interviewer's & Supervising Office
- Demographic Characteristics
- Personal Information
- Individual's economic activities (for persons 10 and above)
- Total land area owned and or cultivated by any member/s of household(including boarders, lodgers and servants)

Expenditure

- Daily consumption on Food, Drink and Tobacco
(Cereals, Prepared foods, Pulses, Vegetables, Leafy Vegetables, Yams & other, Meat, Fish, Dried fish, Eggs, Coconuts, Condiments, Other foods, Milk and milk foods, Fats and Oils, Sugar, Juggery and Treacle, Dried foods, Canned Fruits, Confectioner and Short eats, Beverages-Non alcoholic, Liquor, Drugs and Tobacco)
- Household expenditure on Housing, Fuel and Light, Non-durable goods, Services and Consumer durables for main Household (Housing, Fuel and Light, Personal care expenses, Health expenses, Transport fees, Maintance of private Vehicles ,Communication, Education, Recreation entertainment, Non durable household goods, Household services, Clothing and Textiles, Foot wear and other personal affects, Durable household goods, Other expenses, Other ad-hoc expenses)
- Expenditure on Housing, Fuel & Light, Non-durable goods, Services & Consumer durables for boarders & domestic servants.

Income

- Income from paid employment/s during last four weeks/ last calendar month
- Income from agricultural activities - (Paddy, Other seasonal crops)

- Income from other agricultural activities.
- Income From Non- agricultural activities
- Income from Other cash receipt during last calendar month / last 12 month
- Income by Chance or ad-hoc gains during last 12 months
- Income in kind during last calendar month

Sampling

Sampling Procedure

A multi-stage stratified random sample design was used in this survey. Sectors of the District are the domains for stratification. The Master sample frame prepared for the Demographic Survey 1994 was used in this survey. There were about 4000 Primary Sampling Units (PSUs) in the frame. From this frame, a sample of 1061 PSU's were drawn for Income and Expenditure Survey 1995/96. From each sampled PSU, 20 numbers of housing units (final sampling units) were drawn to reach a sample of 21,220 housing units. Therefore the weighting factors calculated for Income and Expenditure Survey 1995/96 were based on the corresponding factors of the Demographic Survey 1994.

Sample allocation

The District and Sector allocation of the number of housing units to be surveyed was done proportionate to the square root of the total number of housing units in the District and Sector. However selected areas under the urban sector of the Colombo District and the Gampaha District were over-sampled to obtain a better representative sample and to obtain weighting factors for computation of Consumer Price Indices.

(Refer section 1.3 of the Final Report attached in the external resources section)

Estimation Procedure

(Refer section 1.4 of the Final Report attached in the external resources section)

Response Rate

The all Island response rate was

Questionnaires

Overview

Questionnaires

The survey schedule was designed to collect data on household basis and separate schedules were used for each household (identified according to the definition of the household) within the housing units selected for the survey. The survey Schedule consists of three main sections .

1. Demographic section
2. Expenditure
3. Income

The demographic characteristics and usual activities of the inmates belonging to the household are reported in the Demographic section of the schedule and close relatives temporarily living away are also listed in the section. Expenditure section has two sub sections to report food and non-food consumption data separately. Expenditure incurred on their own decisions by boarders and servants are recorded in the sub section under the expenditure section. The income has seven sub sections categorized according to the main sources of income.

Data Collection

Data Collection Dates

Start	End	Cycle
1995-11-01	1996-10-01	N/A

Data Collection Mode

Face-to-face [f2f]

DATA COLLECTION NOTES

Field data Collection

Data collection in the field was done by the statistical officers attached to the Divisional Secretariats under each District. The allocated number of blocks for the District that is to be surveyed in the month was equally distributed among the available weeks of the month. A fresh listing of total housing units belonging to the block was done one month before the survey and selection of the SSU's were made from this updated list.

The data collection was done in three visits made to each household by the data collectors. On Monday, the demographic and income related data were collected into the survey schedule and the members of the households were educated to report the consumption of different items in the week. A separate sheet was provided to record the consumption during the rest of the week by the members of the households. A second visit was made in the mid-week to supervise the households recording consumption. The report was collected back after making the necessary corrections in the third visit made on the following Sunday.

Data Collectors

Name	Abbreviation	Affiliation
Department of Census and Statistics	DCS	Ministry of Finance and Planning

SUPERVISION

The field officers (statistical officers) were supervised by the personnel above them in the organization hierarchy such as Statisticians, Deputy Directors & statisticians attach to the Sample Survey Division

Data Processing

Other Processing

Data was processed in District-wise batches and stored in separate files.

Data processing included the following steps.

1. Counting and accepting the filled questionnaires by the DP Division
2. Do a visual check for completeness
3. Preliminary editing and marking codes
4. Entry of data
5. Run edit program for each District batch
6. Produce error report and return to the Survey office
7. Correction of errors on the report
8. Change incorrect data using the corrected error report
9. Re-run the edit program and repeat the error correction procedure
10. Produce final report on clean data with a backup of clean data.

After all batches have been processed, all data files were combined together and then the following activities were done :-

- 11) Re-coding of variables needed for analysis
- 12) Adding sample weights
- 13) Tabulations

Data Appraisal

Estimates of Sampling Error

Refer the section 1.4 of the final report attached in the External Resources section.
