VERSION DESCRIPTION

v1.0: Full edited dataset, for internal use.

PRODUCTION DATE

2010-01-08

Overview

ABSTRACT

The survey covers a sample of establishments in the organised sector (establishments with 5 or more paid employees) engaged in production, construction, transport, storage and business services etc. Although it covers both public and private sector establishments is limited to the Statutory Boards, Corporations and a few Government Departments such as the Department of Buildings, the Marketing Department, the Railway Workshop, the Government Factory, the Government Printer etc. Other Departments whose functions do not strictly come within the scope of the survey were excluded.

The objective of the sample survey is to collect detailed labour statistics on a repetitive basis to indicate trends. Statistics of earnings and hours of work are collected including number employed, man days worked and paid for normal, and overtime man hours and the components of the total wage bill. These statistics are collected according to the eightfold broad occupational categories e.g. Administrative & Managerial Workers, Professional, Technical and Related Workers, Clerical and Related Workers etc.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

The survey covers establishments with 5 or more paid employees.

Scope

NOTES

The scope of SSE 1981 includes :-

Serial no

Special Industry Code

District

Sector

The details such as (No. of employees, Total man days worked, On paid holidays, On paid leave days, Total man hours worked (Normal), Total man hours worked (Overtime), Basic Salaries & Wages, Special allowances, Overtime cash payments, Other cash payments, Estimated value of payments in kind) by.

Administrative & Manegerial Workers

Professional, Technical and Related Workers

Clerical & Related Workers

Sales Workers

Supervisors & Foremen

Skilled & Semi-Skilled

Unskilled

Young & Child Workers

Total Workers

Sampling

Sampling Procedure

A probability sample of about 1750 establishments were selected for the survey from some 12,000 establishments, the frame being the responding establishments of the Annual Employment Survey 1980. About 900 establishments with employees over 100 were included in the Survey as a whole and establishments with employees below were subjected to sample selection. The method of stratified random sampling was adopted to select the establishments such that the sample will be optimum in size to give the estimates a predetermined degree of precision which was fixed at 5% error at 95% confidence limits.

Questionnaires

Overview

In 1981, the same schedule which was used in 1980, was used to collect the data.

Data Collection

Data Collection Dates

Start	End	Cycle
1981-07-01	1981-07-31	N/A

DATA COLLECTION NOTES

The Programming Assistants of the Statistics Branch of the Department of Labour are responsible for the collection of the data from the sample establishments. Data was collected from the records and the registers of the establishments.

Data Processing

Data Editing

Certain edit checks were introduced in the Computer Programs and on the basis of that some quality checks were exercised.

Data Appraisal
