Table 2 : Economically inactive population by gender and sector-Second Quarter 2014

According to the Table 1, the esti-
mated economically active popu-
lation is about 8.8 million in the
second quarter 2014. Of which
65.3 percent are males and 34.7
percent are females. Out of the
economically inactive population
24.9 percent are males and 75.1
percent are females (Table 2).

Considering the Table 4, the distribution of LFPR by age group and by gender depicts high male participation compared to female in all age groups. The highest overall participation rate is reported from age group (45-49). The age group (30-34) reports the highest male participation , while age group (45-49) reports the highest female participation.

## Unemployment ....

Figure 3 : Unemployment rates and it's 95% confidence intervals (2013Q1 - 2014Q2)

<sup>1</sup>Sampling error: When a sample, rather than the entire population, is surveyed, estimates differ from the true population values they represent. This difference, or sampling error, occurs by chance, and its variability is measured by the sampling error of the estimate.

For more details, please refer the explanatory note given under the labour force link in the DCS website; www.statistics.gov.lk

The number of unemployed persons is estimated as about 398,665 during the Second quarter 2014. The unemployment rate for the second quarter 2014 is 4.5 percent.

As shown in Fgure 3, it is very important to note that, when sampling error¹ is considered there are no statistically significant drops/increases of unemployment rates reported in different time periods starting from second quarter 2013 to Second quarter 2014.

25—29	9.4	6.9	13.9		
Over 30	1.6	1.0	2.6		

As can be seen from Table 8, overall unemployment rate reported for female is 6.7 percent and it is 3.4 percent for male. Youth unemployment rate 15 – 24 years reported for second quarter 2014 is 19.5 percent and that reported the highest unemployment rate among all other age groups. These rates for both males and females are 15.8 and 26.3 percent respectively.

Further the survey results revealed that the unemployment among females is higher than that of males, in all age groups.

The highest unemployment rate is reported from the G.C.E (A/L) and above group which is about 8.7 percent. Corresponding percentages are 5.7 percent and 11.9 percent for males and females respectively. Female unemployment rates are higher than those of males in all levels of education.
