## Overview

---

The survey schedule was designed to collect data on household to household basis; separate schedules are used for each household identified according to the definition of the household within the housing units selected for the survey. The survey schedule consists of three main sections:

1. Demographic section
2. Expenditure
2. Income

The demographic characteristics and usual activities of the inmates belonging to the household are reported in the Demographic section of the schedule and close relatives temporarily living away are also listed in this section. Expenditure section has two sub sections to report food and non food consumption data separately. Expenditure incurred on their own decisions by boarders and servants are recorded in a sub section under the expenditure section. The income section has seven sub sections categorized according to the main source of income.

### Data Collection Mode

Face-to-face [f2f]

#### DATA COLLECTION NOTES

Data collection in the field was done by the Statistical officers attached to the Divisional secretariats under the said Districts.

The allocated number of blocks to the District that is to be surveyed in the month was equally distributed among the available weeks of the month. A fresh listing of total housing units belong to the block was done one month before the survey and the selection of SSU's were made from this updated list.

The data collection was done in three visits to the selected housing unit in a given week. The first visit was made on Monday to collect the demographic and income related data into the survey schedule and to educate the members of the household about reporting the consumption of different items within the week.

A separate sheet was provided to report the consumption and expenditure of items on daily basis within the week. A second visit was also made in the middle of the week to supervise the household's progress in reporting the consumption. The report was collected back after making the necessary corrections in the third visit made on the following Sunday. In his second visit itself, the enumerator recorded the previous day's consumption through a direct interview. (The consumption during the rest of the week was reported in the sheet by the members of the household.)

#### SUPERVISION

Supervision of the fieldwork of these enumerators was done by the statisticians attached to the Sample Survey Division of DCS and District Secretariat Offices.

# Data Processing

## Other Processing

---

Data processing included the following steps.

1. Data collection is done by the Field staff
2. Organizing and batching the filled schedules by the field staff
3. Post the schedules to Div 9
4. Preliminary editing and coding by Div 9
5. Entry of data by DP Division from the filled schedules
6. Correct errors in the data using computer editing
7. Applying weights.
8. Prepare the final data file
9. Produce tables from clean data.
