## Preface

Sri Lanka Labour Force survey was designed to measure the levels and trends of employment, unemployment and labour force in Sri Lanka. This survey is being conducted quarterly, since the first quarter of 1990. A nationally representative annual sample of about 16,000 housing units have been selected for the survey in 1999. The present report, which is the thirty eighth in the series, is based on a sample of 4000 housing units and gives national estimates with a stipulated standard error of labour force characteristics as reported in the reference period of the second quarter of 1999. The survey could not be conducted in areas of Northern and Eastern provinces due to the disturbed situation.

Planning and the execution of the survey was done by the staff of the Sample Survey Division under the guidance of Mrs. s. Vidyaratne, Director and the direction of Mr. G.Y.L. Fernando, Deputy Director and under the supervision of Mr. J.A.P. Balasuriya, Statistician.

The computer data processing was done by Mr. P.A. subawickrema, Statistical Officer and Miss. W.A.S.M.P. Gunasekara, Miss Chitra Nakandala, Statistical Investigators of Sample Survey Division, under the supervision of Mr. J.A.P. Balasuriya, Statistician, using Micro Computers.

This publication was organized and prepared by Mrs. Dharma Dissanayaka, Statistician assisted by Mr. J.A.P. Balasuriya under the direction of Mr. G.Y.L. Fernando, Deputy Director.

The Data Processing Division under the direction of Mrs. S.V. Nanayakkara, Deputy Director (in-charge) and under the supervision of Mr. W. Sumanasiri, Deputy Director and Mr. Migara Fernando, Systems Analyst/Programmer was responsible for the survey data entry and preparation of computer edit programs and final tabulation programs.

District field staff of the Department who worked on the survey deserve a special word thanks. They include District Statisticians, Statistical Officers and Statistical Investigators, all who worked hard in the data collection stage, to make this survey a success.

Printing of the report was done at the Printing Division under the direction of Mr. K.D. Siripala, Deputy Director.

Finally, I wish to express my appreciation to all the respondents of the survey for their co-operation.

**A.G.W. Nanayakkara,**  
**Director General of Census and Statistics.**

# 1 INTRODUCTION

The field work of the survey in the second quarter of 1999 was done in April and May 1999 and the current labour force status of persons was measured as in the reference weeks of April and May 1999. The estimates described in the following sections will exclude the Northern and the Eastern Provinces in its national level estimates and the survey covers only the persons living in housing units and it excludes the institutional population.

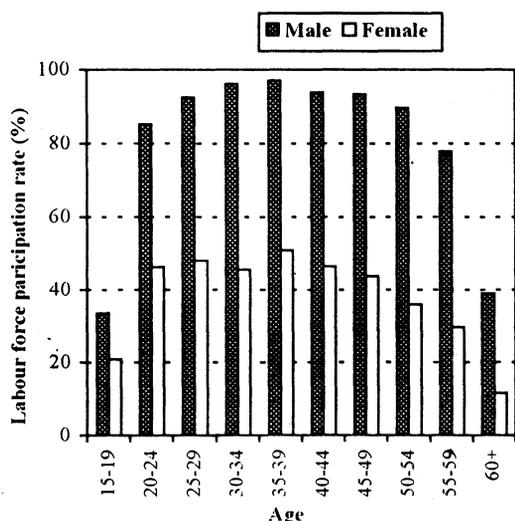

## 2. Economically Active Population

- The economically active population in Sri Lanka is estimated at 6.5 million. Of this number 5.9 million are employed and 0.6 million are unemployed.
- Of the persons aged 10 years and over, 49.5 percent is estimated to be economically active.
- A relatively higher participation can be seen in the middle age groups for males and females.
- The highest participation rate can be seen for both males and females in the age group 35-39 years.

**Table (i) - Labour force participation rate by age & sex**

Age (in years)	Total	Male	Female
All age groups	49.5	66.8	32.6
15 - 19	27.3	33.5	20.9
20 - 24	67.0	85.2	46.3
25 - 29	69.4	92.4	48.0
30 - 34	70.2	96.2	45.7
35 - 39	72.5	97.0	50.8
40 - 44	68.8	93.8	46.5
45 - 49	69.6	93.3	43.9
50 - 54	61.8	89.6	36.0
55 - 59	53.1	77.9	29.6
60 & over	24.8	39.0	11.5

**Fig 1 - Labour force participation rate by age and sex**

Sex	Sector		
	Total	Urban	Rural
Total	49.5	44.3	50.4
Male	66.8	64.0	67.4
Female	32.6	25.5	33.9

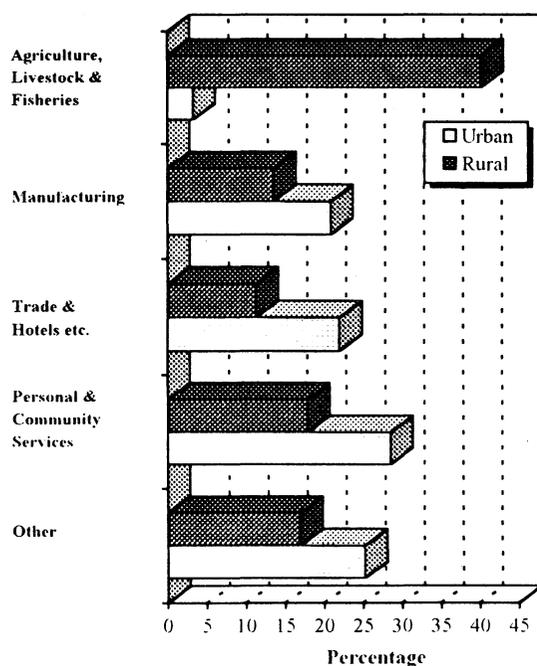

### 3. Employed Population

- The employed population in Sri Lanka is estimated at 5.9 million.
- Of the employed persons 4.0 million (or 68.3 percent) are males and 1.9 million (or 31.7 percent) are females.
- Of the employed persons, 0.8 million (or 14.1 percent) are residing in the urban sector and 5.1 million (or 85.9 percent) are residing in the rural sector)
- The highest proportion of employed persons are reported in the major occupational groups "Elementary occupations" and "Skilled agricultural & Fishery workers" group for both males and females.
- Occupations under the major industrial group "Agricultural, Livestock and Fisheries" have dominated all other industrial groups in the rural sector.

**Table (iii) Percentage distribution of currently employed population by sex and major occupational group**

Major occupational group	Sex		
	Both	Male	Female
Total	100.0	100.0	100.0
Senior Officials & Managers	1.3	1.6	0.6
Professionals	5.8	3.6	10.6
Technicians & Associate-Professionals	5.4	5.7	4.7
Clerks	4.7	3.4	7.4
Sales & Service Workers	13.4	15.6	8.7
Skilled Agricultural & Fishery workers	22.5	21.1	25.6
Craft & related workers	15.2	15.0	15.6
Plant & Machine Operators & Assemblers	5.9	7.4	2.5
Elementary Occupations	22.2	22.1	22.4
Unidentified	3.7	4.5	1.8

**Fig 2 - Percentage distribution of currently employed population by major industrial group & Sector**

Insurance & Real Estate	1.6	4.1	1.1
Personal & Community Services.	19.4	28.5	17.9
Not Defined.	4.8	7.7	4.3

- Occupations under the major industry group "Personal & Community Services" dominate all other major industry groups in the urban sector.
- Of the employed persons, nearly 57.0 percent work as "employees" and another 28 percent work as "own account workers".
- A higher proportion of employed persons work as "unpaid family workers" in the agricultural sector as compared to the non agricultural sector (respective proportions being 25.6 percent and 4.8 percent in the two sectors.)

**Fig 3 - Percentage distribution of currently employed population by employment status**

Own-Account Worker	28.3	40.6	21.4
Unpaid Family Worker	12.3	25.6	4.8

**Fig 4 - Percentage of currently employed persons by employment status and major industrial sector**

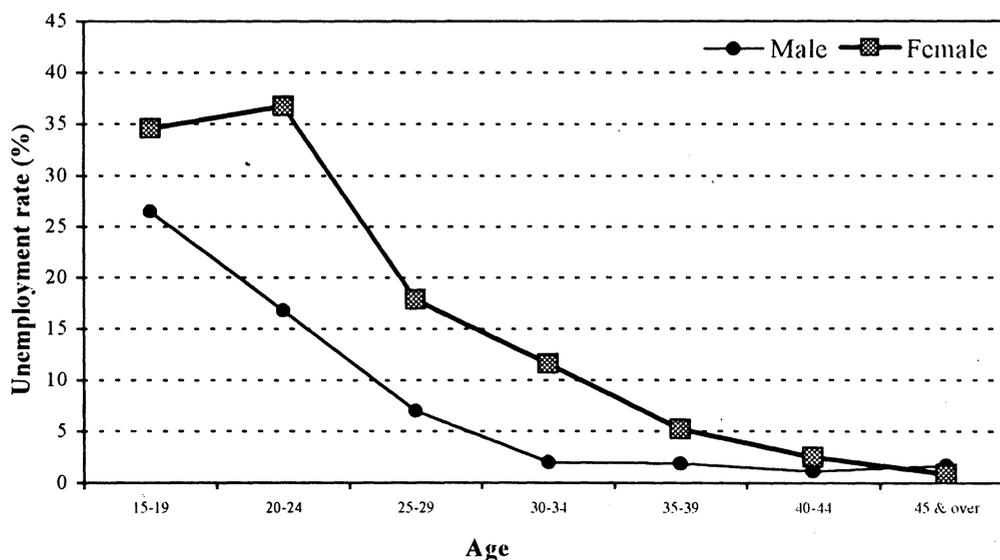

#### 4. Unemployed Population

- The unemployment rate in Sri Lanka is estimated at 8.5 percent.
- The unemployed population in Sri Lanka is estimated at 551829 of which 270614 are males and 281214 are females.
- The highest unemployment rates have been reported in the age group 15-19 yrs for males and in the 20-24 yrs age group for females.
- A higher unemployment rate is reported in the rural sector (8.5 percent) as compared to the urban sector. (8.2 percent)

Table (vii) - Unemployment rate by age group and sex

Age Group (years)	Sex		
	Total	Male	Female
All Age Groups	8.5	6.3	13.0
15 - 19	29.5	26.5	34.6

40 - 44	1.6	1.1	2.5
45 & over	1.5	1.7	0.9

Fig 5- Unemployment rate by sex and age

## 5. Educational Attainment

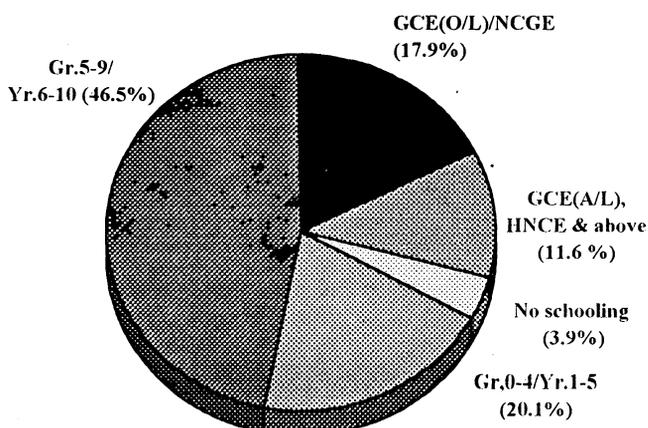

- More than 29 percent of the employed persons have attained a level of education equivalent to G.C.E. (O/L) or above.
- Majority of employed persons have attained an educational qualifications grade 5-9 only..
- Of the unemployed females, nearly 60 percent have attained educational qualifications equivalent to G.C.E. (O/L) or above. Corresponding proportion for unemployed males is 41.7 percent.
- About 57 percent of the unemployed males have attained on education at or below Grade 9 only. Corresponding proportion for females is nearly 40 percent.

**Table (viii) - Percentage distribution of currently employed and unemployed population by level of education and sex**

## Appendix - 1

### Technical Notes

#### A. Introduction

The data is derived from household interviews obtained from a sample of the population 10 years of age and older. The survey is conducted quarterly by the Department of Census & Statistics and provides comprehensive data on the Labour Force, the Employed, the Unemployed and includes such characteristics as age, sex, occupation, and industry attachment. The survey also provides information on hours worked, and reasons for unemployment and nonparticipation in the labour force. The survey is conducted by trained interviewers from a total annual sample of about 16000 household. The data collected are based on the respondent's activity or status during the preceding week and previous 12 months period.

#### B. Collection and Coverage

Data are collected quarterly during a similar time period in each quarter through a scientifically selected sample designed to represent the non-institutional household population. About 4000 households are visited each quarter. Respondents are interviewed to obtain information about each member of the household, 10 years of age or older. The inquiry relates to the previous calendar week of the interview to obtain "current" information, and to the previous 12 calendar months to obtain "usual" activity information.

Inmates of institutions, military camps, and are not surveyed.

#### C. Concepts and Definitions :

The concepts and definitions underlying the labour force data from this survey differ somewhat from those in previous labour force surveys. Therefore comparisons of data should be made carefully taking into account the concepts and definitions that follow:

**Labour Force :** The Labour Force is composed of the economically active population aged 10 years and over.

**Economically Active Population :** The economically active population is defined as those persons who are/were employed or unemployed during the reference period of the survey.

**Employed :** Employed persons are all household members who during the reference period worked as paid employees, employers, own account workers (self-employed) or unpaid family workers, in family enterprises. Also included are persons who had a job but were temporarily absent from work because of such things as vacation, illness, bad weather, and labour management disputes etc. It should be noted that if a person has one or more jobs, that person is counted only once.

**Unemployed :** Persons who were available and/or looking for work, and had no employment during the reference period, are considered to be unemployed.

**Reference Period :** In this survey there are two reference periods, "current" and "usual". The "current" reference period is the week preceding the week of data collection, i.e. last week.

The "usual" reference period is the preceding 12 months , i.e., the past 12 months.

**Currently Economically Active :** A person who was employed or unemployed is considered to be currently economically active.

**Usually Economically Active :** A person whose major activity during the past 12 months was employment and/or unemployed is considered to have been usually economically active. Twenty -six weeks or more is the measure that determines the major activity of the respondent for the year.

**Currently Employed :** A person who works for pay, profit, or unpaid family gain for one (1) hour or more during the past week is considered to have been employed during that period. This includes persons whether paid or not, with a job but not at work for the various cited above.

**Usually Employed :** A person whose major economic activity during the past 12 months was employment is considered to have been usually employed.

**Currently Unemployed :** A person who did no work but who was looking or available for work during the past week is considered to have been currently unemployed.

**Not in Labour Force (Not Economically Active) :** Persons who were neither working nor available /looking for work are classified as not in the labour force. This group includes persons engaged in own house work, going to school, unable to work because of long term infirmities, retired, and others. Others include persons voluntarily idle.

#### **MEASURES OF THE LABOUR FORCE :**

**The working age population** is the total non-institutional household population aged 10 years or over.

**The participation rate** is the proportion of the labour force that is in the working age population.

**The labour force** is the number of persons classified as employed or unemployed according to the criterion described above.

**The unemployed rate** represents the number of unemployed persons as a percent of the labour force.

These measures can be computed for age, sex, educational attainment and other personal or economic characteristics.

**Occupation, Industry and Employment Status :** These apply to the job held by the currently employed during the survey week. For persons with more than one job, it is usually the main job that is described. However , classifications are also made for the secondary job. Occupations are classified according to the International Standard Classification of Occupations (ISCO), ILO, 1988. Industry is classified according to ILO's International Standard Industrial Classification. The employment - status classification specifies employment in the public or private sectors, and further breaks down into employees (wage and salary workers), employers, own account workers (self-employed), and unpaid family workers.

**Hours of Work** refer to hours actually worked during the week. If the hours actually worked are less than the hours usually worked, respondents are asked the reasons for working fewer hours, which include the following: illness or injury, strike, vacation, reduction in economic activity, off season inactivity, bad weather, mechanical or electrical failure, and shortage of raw materials.

**A Household** consists of all persons, related or not, who occupy a housing unit, which covers a house, an apartment, a group of rooms when occupied as separate living quarters. Domestic servants, Boarders, and lodgers who live and have their meals or share other essentials of living with the family are also related as members of the household. Persons, who usually live here but are temporary away are included as members of the household, but persons who have usual residence elsewhere, but are present at the time of the interview, are excluded.

**Geographic Data** : Data is available at national and provincial levels, and further broken down by urban and rural categories. URBAN areas are those that have an administrative structure of a Municipal Council, an Urban Council. Rural areas are those not classified as urban.

#### **D. SAMPLE DESIGN**

The Survey is conducted quarterly to produce estimates of employment, unemployment, labour force participation and basic demographic characteristics. The scope of coverage includes all households in Sri Lanka.

The list of housing units created for Demographic Survey 1994 were taken as sample frame. Sample lists were selected from the above frame taken as primary Sampling Units (PSU). A systematic Sample of 15 housing units per PSU was selected on final sampling units.

The total annual sample size is 15915 housing units, distributed as 265 PSUs per each quarter and 15 housing units (SSUs) per PSU. The allocation to the domains aims at ensuring approximately equal levels of reliability from domain to domain.

The 1,061 PSUs were selected by systematic Sampling from the PSUs created for Demographic Survey - 1994. A listing operation was conducted in each selected PSU to provide a frame for the second stage of selection. The selection of housing units within PSU was systematic with random start.
