Preface

Sri Lanka Labour Force Survey was designed to measure the levels and trends of employment, unemployment and labour force in Sri Lanka. This survey is being conducted quarterly, since the first quarter of 1990. A nationally representative annual sample of about 16,000 housing units have been selected for the survey in 2002. The present report, which is the forty eighth in the series, is based on a sample of 4000 housing units and gives national estimates with a stipulated standard error of labour force characteristics as reported in the reference period of the first quarter of 2002. The survey was not conducted in the areas of Northern and Eastern provinces in the first quarter of 2002. However action has already be taken to extend the survey operation to cover Northern and Eastern provinces commencing from the second quarter of 2002. The labour force estimates for the Northern & Eastern provinces will seperately be published based on the 2002 annual sample.

Planning and the execution of the survey was done by the staff of the Sample Survey Division under the direction of Mr. G.Y.L. Fernando, Director (Sample Surveys) and under the supervision of Messers. J.A.P.Balasuriya and M.A.N. Fernando, and Mrs. E.A.G. Perera, Senior Statisticians.

The computer data processing was done by Mrs. W.A.S.M.P. Gunasekara and Mrs. Chitra Nakandala, Statistical Officers, of Sample Survey Division, under the direction of Mrs. Dharma Dissanayaka, Senior Statistician and under the supervision of Mr. P.A. Subawickrama, Statistician using Micro Computers.

This publication was organized and prepared by Mr. J.A.P. Balasuriya, Senior Statistician under the direction of Mr. G.Y.L. Fernando, Director (Sample Surveys).

The Data Processing Division under the direction of Mrs.S.V. Nanayakkara, Director (Data Processing) and under the supervision of Mr.W.Sumanasiri, Deputy Director and Mr. Migara Fernando, Systems Analyst/Programmer was responsible for the survey data entry and preparation of computer edit programmes and final tabulation programmes.

District field staff of the Department who worked on the survey deserve a special word of thanks. They include District Senior Statisticians/ Statisticians and field Statistical Officers, all who worked hard at the data collection stage, to make this survey a success.

Finally, I wish to express my appreciation to all the respondents of the survey for their co-operation.

A.G.W.Nanayakkara

1. INTRODUCTION

The field work of the survey in the first quarter of 2002 was done in January and February 2002 and the current labour force status of persons was measured as in the reference weeks of January and February 2002. The estimates described in the following sections will not cover the Northern and the Eastern Provinces in its national level estimates and the survey covers only the persons living in housing units and it excludes the institutional population.

2. Working Age Population (age 10 years & over)

♦ The survey estimated a total of 16.8 million persons as being the population of Sri Lanka (excluding the Northern & Eastern provinces) during the survey period.

♦ Out of the total, nearly 84% persons were in the working age group. (10 yrs and over)

♦ The sex ratio of the working age population is 97.8 percent which implies that there are more females than males in the working age group.

3. Economically Active Population

♦ Out of every 100 persons in the working age, 51.7 persons are economically active.

♦ The highest participation rate is reported in the age group 30 – 39 yrs. for males and in the age group 20 – 24 yrs. for females.

3.1 By Level of Education

♦ It is observed that the male participation is higher than female participation for all levels of education.

♦ Although the participation rate is highest among the persons having the highest level of education, a majority (over 45 percent) of the persons in the labour force have attained a level of education between grades 5 to 9 only.

Table (i) - Distribution of population by age & sex

Age (in years)	Total	Male	Female
All age groups	100.0	100.0	100.0
0 - 9	16.2	16.9	15.4
10 - 14	9.1	9.5	8.8
15 - 19	10.1	10.8	9.4
20 - 24	9.9	10.0	9.9
25 - 29	7.7	7.0	8.3
30 - 39	15.4	14.8	16.1
40 - 49	12.5	12.6	12.5
50 - 59	9.2	9.0	9.4
60 & over	9.8	9.4	10.2

Figure 1 - Labour force participation rate by age & sex

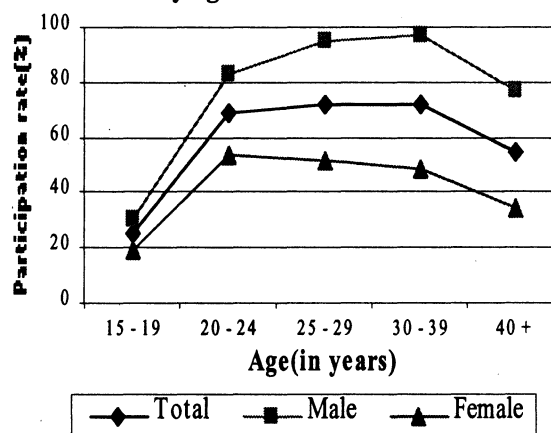

Table (ii) - Distribution of Labour force by level of education & sex

Level of Education	Sex		
	Total	Male	Female
Total	100.0	100.0	100.0
Below Gr.5	23.8	23.4	24.6
Gr. 5 - 9	46.1	50.1	38.8
G.C.E.(O/L)	15.3	15.3	15.3
G.C.E.(A/L) & above	14.8	11.2	21.3

4. Employed Population

♦ The survey estimated a total of 6.6 million persons as employed during the survey period.

♦ Of the employed persons 4.4 million (or 66.6 percent) are males and 2.2 million (or 33.4 percent) are females.

♦ Occupations under the groups 'Skilled Agricultural & Fishery workers' and 'Elementary occupations' account for nearly fifty percent (49.4%) of the employed persons.

♦ By Industry nearly 64 percent, of the employed females engaged in 'Agricultural' and 'Manufacturing' sectors. Corresponding proportion i.e. is only 46 percent for employed males.

4.1 By Level of Education

♦ More than one third (36.7%) of the employed females have completed G.C.E.(O/L) or above. The corresponding proportion for males is 27.3 percent.

♦ The highest proportion of the employed persons is reported under the level of education group Gr.5 to 9. The same pattern can be observed for both sexes.

Note : * Based on ISIC Rev. 3.

** A new group introduced for some practical reasons is not a major occupation group under ISCO - 88.

*** Other includes Mining & Quarrying, Electricity, Gas and water supply, Extra Territorial Organizations & bodies and industries not adequately described.

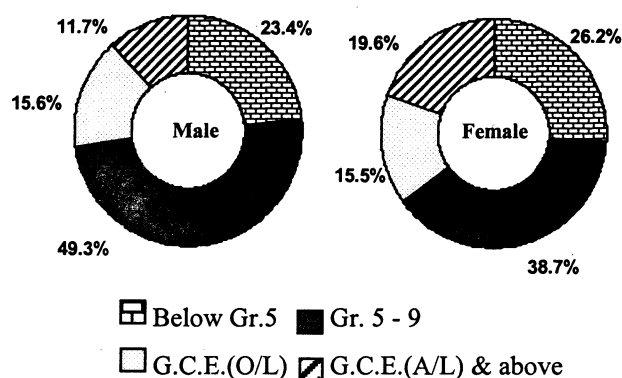

Table(iii) - Percentage distribution of currently employed persons by sex & occupational group

Occupational group	Sex		
	Total	Male	Female
Total	100.0	100.0	100.0
Senior Officials & Managers	1.2	1.3	1.1
Professionals	5.4	3.3	9.4
Technicians & Associate Professionals	5.0	5.0	5.1
Clerks	3.8	2.9	5.5
** Proprietors and managers of enterprises	6.1	7.1	4.3
Sales & Service Workers	7.5	8.0	6.3
Skilled Agricultural & Fishery workers	24.0	23.1	25.9
Craft & related workers	14.9	13.7	17.2
Plant & Machine Operators & Assemblers	5.9	7.9	1.9
Elementary Occupations	25.4	26.5	23.1
Unidentified	0.8	1.2	0.1

Table(iv) - Percentage distribution of employed persons by industry group & sex

Industry group *	Total	Male	Female
Total	100.0	100.0	100.0
Agriculture Forestry and Fishery	35.1	32.9	39.6
Manufacturing	16.9	13.1	24.4
Wholesale and Retail Trade and Repair of Motor Vehicals etc. and Personal and Household Goods	12.6	14.2	9.4
Financial Intermediation, Real Estate, Renting and Business Activities	2.3	2.3	2.3
Public Administration, Defence and Compulsory Social Security	8.3	9.4	6.1
Education	3.2	1.5	6.7
*** Other	21.5	26.6	11.5

Fig 2 - Percentage distribution of employed persons by level of education

4.2 By employment status

♦ The majority of the employed persons engaged in agricultural sector are own account workers. It is 40.2 percent.

♦ The percentage share of the unpaid family workers in the Agriculture sector is 26.3 percent. It is only 4.4 percent in the non agricultural sector.

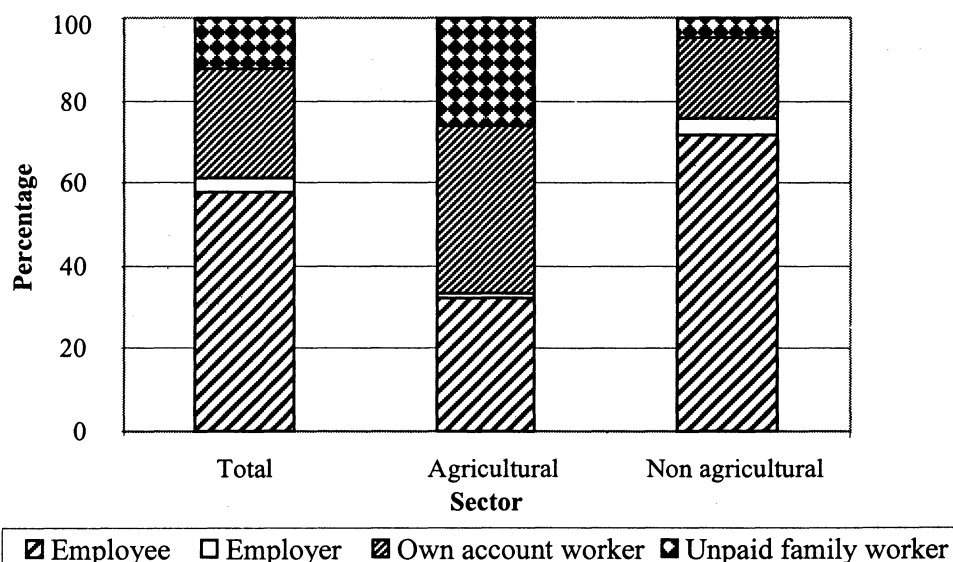

Table(v) - Percentage distribution of currently employed persons by level of education

Level of Education	Total	Sex	
		Male	Female
Total	100.0	100.0	100.0
Below Gr.5	24.3	23.4	26.2
Gr. 5 - 9	45.8	49.3	38.7
G.C.E.(O/L)	15.6	15.6	15.5
G.C.E.(A/L) & above	14.3	11.7	19.6

Table(vi) - Employed persons by Employment Status & major industry group

Employee	57.9	32.2	71.8
Employer	3.1	1.3	4.1
Own Account worker	26.9	40.2	19.7
Unpaid family worker	12.1	26.3	4.4

Figure 3 - Employed persons by Employment Status & major industry group

5. Unemployed Population

♦ The unemployment rate is estimated at 8.7 percent in the first quarter of 2002.

♦ It is observed that the incidence of unemployment is relatively high among those in the ages 15 to 24 and low in older age groups.

5.1 By level of education

♦ More than half (52.7%) of the unemployed persons have attained education qualifications equivalent to G.C.E.(O/L) or above.

♦ The proportion of unemployed females with educational attainment G.C.E.(A/L) & above is considerably higher as compared with males. (19.2 percent for males and 40.6 for females)

♦ The highest proportion of unemployed persons is recorded under the level of education group, grade 5 – 9 for both urban and rural sectors.

Figure 4 – Unemployed population by level of education

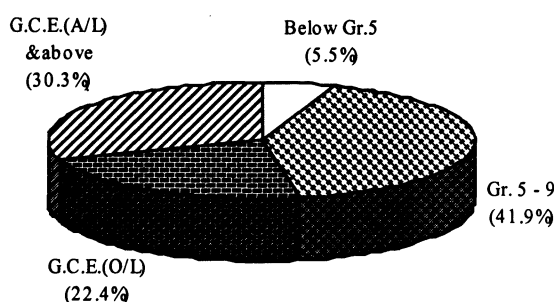

Table (vii) - Unemployment rate by age group & sex

Age Group (years)	Sex		
	Total	Male	Female
All Age Groups	8.7	6.5	12.8
15 - 19	22.9	19.9	28.4
20 - 24	25.2	22.3	29.7
25 - 29	10.7	6.2	17.6
30 - 39	5.7	3.1	10.4
40 & over	1.4	1.1	2.0

Table (viii) - Unemployed population by level of education & sex

Level of education	Total	Sex	
		Male	Female
Total	100.0	100.0	100.0

Gr. 5 - 9	41.9	44.1	41.6
G.C.E.(O/L)	22.4	22.0	22.4
G.C.E.(A/L) & above	30.3	30.5	30.3

6. Statistical significance of the difference between the estimated unemployment rate of the first quarter of 2002 and the estimated average annual rates of year 2001 and fourth quarter of year 2001 respectively.

- ♦ Estimated value of the unemployment rate in first quarter of year 2002 = 0.087
Estimated value of the unemployment rate in year 2001 = 0.079

The difference between the above estimated values is **statistically significant** at 5 percent level of significance (two tail test)

- ♦ Estimated value of the unemployment rate in first quarter of year 2002 = 0.087
Estimated value of the unemployment rate in fourth quarter of year 2001 = 0.083

The difference between the above estimated values is **not statistically significant** at 5 percent level of significance (two tail test)

7. Alternative Estimates of Employment, Unemployment and Labour Force Characteristics

♦ Official employment, unemployment and labour force characteristics are estimated at the Sri Lanka Labour Force Survey, based on the internationally comparable concepts and definitions recommended by the ILO. However the validity of the concepts and definitions used at the survey is questioned very often in some forums, for the appropriateness of these concepts and definitions in the Sri Lankan context.

The concepts and definitions, which were found to be controversial are as below.

(1) Number of Hours of Work :

A person who works **at least one hour** during the reference week, is considered **employed**, under these definitions.

(2) Working Age Population :

All persons of **age 10 years and over** are considered to be in the working age.

(3) Employment Status :

All, a) Paid employees, (those who work for wages/salaries).

b) Employers (who have at least one paid employee under them).

c) Own account workers (who carry out the economic activity without having any paid employees).

d) Unpaid family workers (who make their contribution to the economic activities carried out by their own household, without wages/salaries).

The validity of the above concepts and definitions is raised due to the following reasons.

(1) **Number of hours of Work** Some point out that **one hour per week** is too low, to consider a person to be employed.

(2) **Working age Population** Some point out that persons in the age group 10-14 yrs. are too young to consider to be in the working age.

(3) **Employment Status** Some point out that 'unpaid family workers' may work in the family enterprise

without payment because they have no other work, and so it is not appropriate to consider them as **employed**.

An attempt has been made to produce an '**Alternative set of Employment, Unemployment and Labour Force Characteristics**,' by revising the original concepts and definitions so that the above issues are addressed as explained below.

The revisions made are,

(1) Number of Hours of Work :

Persons who work **20 hours or more per week only** are considered to be employed.

(2) Working Age Population :

Persons who are **over 15 yrs of age only** are considered to be in the working age.

(3) Unpaid Family Worker :

Unpaid family workers are **not** considered as employed. Those unpaid family workers who were reported to be seeking some other work are considered as **unemployed** and the rest of the unpaid family workers are considered as **economically inactive** (not in the labour force) so **only, a) paid employees b) employers and c) own account workers are considered to be employed.**

Following tables are based on the above alternative concepts and definitions.

TABLE 1 - LABOUR FORCE STATUS OF HOUSEHOLD POPULATION 15 YEARS & OVER (ALTERNATIVE ESTIMATES)

7.1 Labour force

♦ It is observed that the standard labour force participation rate is higher than the alternative participation rate in all the age groups. This is due to the fact that the unpaid family workers who are not seeking other work are considered as economically inactive under the alternative estimates.

7.2 Unemployment rate

♦ It is observed that the unemployment rate which has been calculated under the alternative definitions are higher than the unemployment rate which has been calculated under the ILO standard definitions in all age groups. The difference of the unemployment rates between standard and alternative estimates decreases as the age group advances. This is because the proportion of unpaid family workers to the total employed persons decreases as the age group advances and the chances are higher to have persons who are seeking other work among the unpaid family workers, in the lower age groups.
