#### SAMPLING PROCEDURE

The Survey is conducted quarterly to produce estimates of employment, unemployment, labour force participation and basic demographic characteristics. The scope of coverage includes all households in Sri Lanka.

The list of housing units created for Population Census - 2001 were taken as sample frame. Sample lists were selected from the above frame taken as Primary Sampling Unit (PSU). A systematic Sample of 10 housing units per PSU was selected on final sampling units.

The total annual sample size is 16000 housing units equally, distributed as 400 PSUs per each quarter and 10 housing units (SSUs) per PSU. The allocation to the domains aims at ensuring approximately equal of reliability from domain to domain.
