SERIES INFORMATION

The Census of Industry carried out by the Department of Census and Statistics (DCS) in 2003/2004 is the sixth industrial census in a series of Industrial Censuses conducted by the DCS since 1946.

With the steady increase in industrial activities and the outstanding recognition of the importance of industrial statistics for the purpose of planning, policy making, investment promotion and research etc. the conduct of Census of Industry is important. Industry Census provides reliable and detailed benchmark statistics on the size, distribution and types of industries.

The Census of Industry 2003/2004 was a major statistical event of importance, since it was taken twenty years after the last Industrial Census of 1983 and to assess the current situation of industrial sector in the context of the policy of liberalization of the country's economy introduced in 1977.

The Census covered establishments engaged in

1. Mining and Quarrying,
2. Manufacturing and
3. Generation and Distribution of Electricity, Gas and Water

as per the Economic Activities represented by the United Nations International Standard Industrial Classification (ISIC) Revision 3.

ABSTRACT

The Census of industry 2004 covered establishments engaged in the economic activities of

1. Mining & quarrying
2. Manufacturing
3. Generation and Distribution of Electricity, Gas and Water

Three questionnaires Long Form, Short Form and M&Q Form were used to canvass Large and Medium scale industrial establishments, Small scale establishments and Mining and Quarrying establishments respectively.

The final Census was conducted during October - November 2004 by posting the questionnaires to approximately 9000 large and medium scale industrial (person engaged 10 and more) establishments and by personally visiting approximately 21000 establishments which is a representative sample of small scale industries (persons engaged less than 10).

The Department of Census and Statistics (DCS) usually conducts Census of Industry once in ten years in order to have a full coverage of industrial establishments within the territorial boundary of Sri Lanka. The earliest attempt made at seeking information from the industrial sector was in the "Census of Agriculture and Industries", which was conducted in conjunction with the Population Census in 1946. With the steady increase in industrial activities in Sri Lanka and the growing recognition of the importance of industrial statistics for the purposes of planning, a systematic attempt was made to collect data on industrial production through the Census of Industry in 1952.

This covered Mining and Quarrying, Manufacturing, Electricity and Gas and also Construction. The Census of Industry, 1952 was confined only to the factory type of establishments, i.e. industrial establishments which had not less than 5 paid employees and which had employed a capital of not less than Rs. 3,000 and used mechanical power in any of its production

processes. Among the major agro-based export industries, coconut and oil milling were covered in the 1952 census, while tea factories and rubber mills were excluded, and brought instead within the scope of the Census of Agriculture.

The next Census of Industry was conducted in 1964, the scope and coverage of which was similar to that of the 1952 census. The frame for this census was based on a list of buildings prepared for the Census of Population 1963. However, there was considerable difficulty in identifying the buildings in which industrial activities were carried out. As a result the list of industrial establishments compiled on this basis did not provide a satisfactory frame to determine the overall magnitude of "factory establishments" in the industrial sector. The results as analyzed from the limited number of census returns received, could thus prove to be inadequate for depicting a sufficiently realistic picture of the level and structure of industrial activity in the country.

The Census of Industry conducted by the Department of Census & Statistics in 1983 in accordance with the United Nations program was the last Census of Industry. The 1983 Census of Industry, consisted of two stages and in the first stage, information relating to industries included in the pre-listing schedule F1, in which all buildings were listed in the Census of Population and Housing in 1981, was copied into a separate form and updated depending on the nature of Industry and the number of employees engaged.

In 1983 Sri Lanka participated in the 1983 world programmed Industrial Statistics by carrying out a Census of Industry, on a nation - wide scale. The DCS was supposed to have undertaken the Census of Industry in 1993, but had to postpone until 2003 due to the prolonged unrest prevailed in certain areas of the country.

The Census of Industry held in 2004 is the sixth of its kind in a series of Industrial Censuses conducted by the Department of Census and Statistics for over nearly six decades. It covers establishments engaged in the activities of Mining and Quarrying, Manufacturing and the Generation and Distribution of Electricity, Gas and Water according to the International Standard Industrial Classification (ISIC) Revision - 3 of the United Nations (UN).

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

A questionnaire has to be completed for each establishment (plant, factory, mill, mine, workshop etc.) or jointly for a group of establishments on one site or several sites in the same Grama Niladhari division or ward under one accounting system.

A qualified establishment has
its own manufacturing facility
its own accounting and
a distinct management and location

Ancillary units including administrative offices, warehouses, such as garages, repair shops(which primarily serve the production units) should be treated as part of the establishment.

Industrial establishments - Defined as the unit directed by a single owning or controlling entity that is engaged in the production of the most homogeneous group of goods and services, usually at one location but sometimes over a wider area, for which separate records are available(eg. plant, factory, mill, mine, workshop etc)

In cases where industrial enterprises were engaged in the production of more than one homogeneous group of goods and services in different locations, separate returns were generally obtained for each such product group and location. In cases where establishments operated by a single owner or enterprise was located within the area of one GS Division or Ward, these several units could furnish a single return and this would be reckoned as one establishment.

Ancillary units including warehouses, garages repair shops electric plants which primarily served the needs of a single establishment, if they were in the same site within the same GS division , or Ward were treated as part of the main establishment. Otherwise these were treated as separate establishments but classified to the same industry as the parent establishment.

Scope

NOTES

A questionnaire has to be completed for each establishment (plant, factory, mill, mine, workshop etc.) or jointly for a group of establishments on one site or several sites in the same Grama Niladhari division or ward under one accounting system.

A qualified establishment has
its own manufacturing facility
its own accounting and
a distinct management and location

Ancillary units including administrative offices, warehouses, such as garages, repair shops (which primarily serve the production units) should be treated as part of the establishment.

Industrial establishments - Defined as the unit directed by a single owning or controlling entity that is engaged in the production of the most homogeneous group of goods and services, usually at one location but sometimes over a wider area, for which separate records are available (eg. plant, factory, mill, mine, workshop etc)

In cases where industrial enterprises were engaged in the production of more than one homogeneous group of goods and services in different locations, separate returns were generally obtained for each such product group and location. In cases where establishments operated by a single owner or enterprise was located within the area of one GS Division or Ward, these several units could furnish a single return and this would be reckoned as one establishment.

Ancillary units including warehouses, garages repair shops electric plants which primarily served the needs of a single establishment, if they were in the same site within the same GS division, or Ward were treated as part of the main establishment. Otherwise these were treated as separate establishments but classified to the same industry as the parent establishment.

Industrial censuses are infrequent inquiries conducted in many countries once every five or ten years and are usually aimed at a full coverage of industrial establishments within the territorial boundaries of the country.

The broad objectives of the 2003/2004 Census of Industry were

- (a) to provide measures of the principal indicators of economic activity for the census reference year 2003
- (b) to provide measures that would serve as a "bench-mark" (defined as a complete count or record of objects of statistical interest, at a specific date), for other surveys and for the construction of indices of production etc.
- (c) to develop a comprehensive register of industrial establishments which would serve as an efficient frame for annual, quarterly and monthly inquiries into the structure of activities in the industrial sector,
- (d) to ensure that the concepts and standards of industrial statistics compilation in Sri Lanka fall in line with international recommendations and standards.

The census covered the industrial sector of Sri Lanka, comprising establishments engaged primarily in the activities of Mining and Quarrying, Manufacturing, and of the Generation and Distribution of Electricity, Gas and Water. A complete coverage of all identifiable industrial establishments in the country was not considered feasible due to financial and operational constraints. Hence the enumeration plan called for coverage of all establishments above a designated employment cut-off point and a sample of smaller establishments. It was decided to enumerate all establishments engaging 10 or more persons engaged, to enable estimates to be prepared that would be as close to the universe as was possible.

KEYWORDS

Keyword	Vocabulary
---------	------------

Shipments and Other Receipts	<p>Information on output and other receipts was gathered on a "shipment" basis as recommended by the U.N., rather than on the usual "production" basis. Thus each establishment was requested to report on (i) the quantity and value of shipments of products made, and (ii) receipts on specified categories of industrial services and on other miscellaneous receipts. In the case of products made (category (i) above), shipments covered the moving out or release from the establishment (i.e. from factory, plant, mine etc). of goods produced, to the following broad categories of customer. (a) transfer to other establishments of the same enterprise, including transfer to wholesale and retail organizations under the same ownership, (b) deliveries to other enterprise, (c) delivery of all goods sent abroad for sale. The valuation of goods shipped was to be reported at producers' prices. I.e. the establishment price charged to the customer, whether ex-factory or delivered. The valuation should include all duties and taxes which fall on products when they leave the establishment. Any subsidies received by the establishment were to be excluded, and price rebates, and discounts and allowances on returned goods given to the customer, were also to be deducted. Shipments to other establishments within the same enterprise were to be valued as though sold, or else at book value. Where the shipment of the product takes place ex-factory, the establishment price invoiced to the customer would exclude transportation costs. Where the terms of the shipping transaction involved delivery to the customer however, the charges invoiced to clients were to be reported to include transportation costs as well, and in such instances, the valuation of the shipment would be a somewhat higher price than the standard producers' price, as recommended for compiling national accounts statistics. Under receipts on industrial services and other miscellaneous receipts (category (ii) above), the principal items were (a) contract and commission work done for others on their materials, (b) Repair and installation work done for others, (c) Industrial Services, (d) Value of own-account construction work, and (e) Sale of goods bought and sold in the same condition. The valuation of the above items was to be done at actual invoice price, including taxes charged to the customer. In the case of the specified items of industrial services done for others, as well for own-account investment work, the valuation would include the cost of labor and the overheads apportionable to the work.</p>
Gross Output at Producer's Prices	<p>Since the shipment concept, as recommended by the U.N. was adopted at the 2003/2004 Industry Census, the total value of shipments of products made and of other receipts, as reported by establishments, required an adjustment for changes in the value of their stock of finished goods, goods for resale, and work in progress, to obtain the usual measure of gross output in producers' prices. The derived values of gross output for 2003 have thus been obtained for each establishment as follows: (a) Establishment with 10 and over persons. Gross Output = Total value of shipments of products and other receipts + Net change in the value of the stocks of finished goods, goods for resale and work in progress and (b) Establishments with less than 10 persons For this category of Establishments, the value of shipments and other receipts was reckoned as approximating their gross output value.</p>
Estimates of Value Added	<p>As the term implies, value added is the increment to the value of commodities and services that is contributed by the producing establishment i.e. the value created by the establishment. It is computed as follows. Value added = Gross Output - Cost of raw materials, power and industrial services used. When summed up for all establishments in a given industry, value added is the incremental value of goods and services attributable to that industry. Detailed figures on value added at the three digit level of the ISIC are not included in the main tables of the preliminary release, but summary estimates of value added at Major Division and Industry Division level, are discussed in some detail in the the report.</p>
Employment	<p>The detailed data obtained on employment related to the number of persons engaged in the establishment. The number of persons was defined as the total number of persons, who work in or for the establishment, including working proprietors and active partners, unpaid family workers, operatives and all other employees. (a) Working proprietors and active partners - This category comprised all individual proprietors and partners who were actively engaged in the work of the establishment: Managers and directors, working for pay were to be reported as "other employees". (b) Unpaid family workers - This category included all persons living in the household of the owners and working in the establishment, without regular pay, for at least one third of the normal working time of the establishment. (c) Operatives - This category was defined as all paid employees who were directly engaged in the production or related activities, of the establishment, including any clerical or working supervisory personnel whose function was to record or expedite any step in the production process. (d) Other Employees - This category comprises all paid employees except those already reported as operatives. e.g. administrative, technical and clerical personnel such as salaried managers, and directors, laboratory and research workers, clerks, typists, watchmen, book-keepers, salesmen and the like (e) Home workers - This category included all persons employed by the establishment generally on a piece-work basis, who work in their own homes and whose names appear on the establishment payroll. It does not include home workers who are engaged by subcontractors. The number of persons engaged to be reported, was the average number of employees viz. categories (c), (d) and (e) above, (the arithmetic average of the number of employees in five specified pay periods of the reference year), plus the number of working proprietors and active partners and of unpaid family workers, during the reference year. The figures shown on employment in the tables of this preliminary release refer to the total number of persons engaged, (i.e. the aggregate of the four categories mentioned above).</p>

Wages and Salaries	This category covers all payments whether in cash or kind, made by the employees during the reference year in connection with work done, to all persons included in the count of "employees". The payments include (a) all regular and overtime cash payments, bonuses and cost of living allowances, (b) wages and salaries paid during vacation and sick leave, (c) taxes and social insurance contributions and the like payable by employees but deducted by the employer, (d) payments in kind. Social insurance contribution and contributions and pension and welfare funds payable by the employer are excluded from this category.
Supplements to Wages and salaries	This covered payments made by employers on behalf of this employees with respect to, (a) Statutory social security contributions (e.g. E.P.F., W. & O.P.) and, (b) other programmes such as collectively agreed contractual contributions to private pension and insurance schemes and to the cost of medical and health-care services provided by outside organization etc., The sum of this item and of "Wages and Salaries", for all establishments, equals total compensation of employees in each industry. It is value of this aggregate, which is given under the "wages and salaries" column of the tables of this preliminary release.
Input Costs	Data on inputs requested, covered the costs of (a) Materials, parts, components, containers and supplies (for factory and office) (b) Purchased fuels, water and electricity, (c) Cost of contract and commission work and of repair and maintenance work done by others for the establishment (i.e. industrial services rendered by other establishments) (d) Cost of goods purchased for resale. This reporting of inputs was requested on the basis of "purchasers" rather than of "consumption". The valuation of total inputs and its components was requested at current purchasers' price (equivalent to producers' prices plus the trade and transport charges incurred in delivering the commodities from the producer to the purchaser). The estimates of the total cost of materials and industrial services actually used or consumed by the establishment during 2003, was obtained by adjusting the figures of cost of material and fuels etc. purchased, for changes in its value of stocks of materials, fuels and supplies. (in practice this adjustments involves the adding of the beginning of year value of material stocks to the total purchase value of raw-materials etc. during the reference year, and subtracting the value of raw-material stocks as at end of the same year).
Stocks	Value data was requested on the following categories of stocks owned by the establishment at the beginning and the end of the reference year. (a) Materials, fuels and supplies, (b) Work in progress, (c) Finished goods and (d) Goods for resale In general, stocks acquired from others were to be valued at purchasers' price and those produced internally at producers' price. In the case of the sample of smaller establishments enumerated, where a more limited range of information was canvassed on a short questionnaire, separate data was not sought on stocks as was done in the full enumeration of the medium to larger establishments
Gross Fixed Capital Formation	Gross fixed capital formation, for which data on gross additions to fixed assets were canvassed, is defined as the outlays of industries on additions to their fixed assets, during the reference year, less the corresponding value of sales of used fixed assets. Data sought from establishments thus related to expenditure on all fixed assets (i.e. durable goods) acquired by the establishment, and expected to have a productive life of more than one year. The expenditure figures were to be classified under the following broad types of assets: Land, Buildings and other construction, Machinery and Equipment, Transport Equipment. Expenditures reported were to cover outlays on (a) new fixed assets, which were to include all new assets as well as used imported assets that have not previously been used in Sri Lanka, (b) second-hand assets (i.e. assets previously used in the country), (c) major additions, alterations and improvements to existing assets that ended their normal economic life or raise their productivity, (d) fixed assets and improvements thereto, made by its labor for its own use. Valuation of fixed assets acquired from others was to be at the full cost i. e. the delivered price plus cost of installation and any necessary fees and taxes. Fixed assets produced on own account were also to be valued in the manner as described above. In the case of own-account construction of structures and other works, and of alterations however, the valuation would in practice, often be at explicit cost, including any imputations which may be required in respect of own-labor and material used, and an allocation for overheads. Sales of used assets were to be at the actual amounts realized.

Coverage

GEOGRAPHIC COVERAGE

National Coverage.

The target population for this questionnaire was the Mining and Quarrying establishments in Sri Lanka.

UNIVERSE

The census covered establishments engaged primarily in the activities of Mining and Quarrying, Manufacturing and the production and distribution of Electricity, Gas and water which correspond to major divisions 2,3 and 4 respectively of the UN

classification of ISIC and represented the industrial sector specified for census coverage.

The questionnaire (called Mining and Quarrying Form) to which this data set belongs was administered to the Mining and Quarrying establishments which belongs to the Large and Medium scale or the Small scale category.

Sampling

SAMPLING PROCEDURE

In October-November 2003, DCS conducted a listing operation of Census of Industry prior to the canvass of detailed information on establishments. The census registry was based mainly on notations made during door-to-door canvassing in mid 2000 for the Census of Population and Housing. List of Establishments by Grama Niladhari Divisions were sent in latter part of 2003 to each Grama Niladhari with a request to be updated for industrial establishments (mostly newer ones) that were lacking in 2001, the closures of older ones and for some changes on establishments. The updated list of all industrial establishments was employed as the sampling frame. The whole frame was divided into two groups as establishments with less than 10 persons engaged (Small establishments) and establishments with 10 and more persons engaged (Medium and Large establishments). The small establishments that had less than 10 persons engaged was further divided into two groups as establishments with less than 30 same type of industries (ISIC 4 digits level) and establishments with 30 and more same type of industries (ISIC 4 digits level) in each district.

A total of 30,913 establishments were selected. Those 9,950 establishments that have 10 and more persons engaged were selected with certainty. The small establishments with less than 30 same kind of industries were selected with certainty totaling 9089 while others (i.e. establishment with 30 and more same kind of industries) were selected by using the stratified simple random sample design. In general, strata were defined by the kind of industries at ISIC 4 digits level and district groups. In absence of any other auxiliary variables in the list frame that could be used in the sample allocation and selection, sample sizes across strata were determined using proportional allocation. That is, if N_h is the population size in stratum h and N is the population size, the first iteration sample size n_h in stratum h is derived by

$$n_h = N_h \times 11874 / N$$

DEVIATIONS FROM THE SAMPLE DESIGN

The non-response weight is the ratio the sample size to the total respondents. The establishments that were considered as non-respondents are those who refused to participate in the Census. The following are considered with frame problems: those establishments that cannot be located, those that were closed (they should not be included in the sampling frame), those that are out-of-scope (the ISIC classification was not specified correctly) and those that were duplicates and mergers.

Of the small establishments with 30 and more same kind of industries in the sampling frame, 10.9% should not have been included. This is rather a big percentage of the such small establishments and therefore, requires an adjustment factor to be incorporated in the weight. To illustrate, if N_h is the population size for stratum h and n_h is the corresponding sample size, then the corresponding selection probability P_h is

$$P_h = n_h / N_h$$

If given the stratum h , q_{1h} is the proportion of establishments with frame problems (proportion of those that should not be included in the frame) and q_{2h} is the proportion of establishments that were missed in the frame (those that should be listed but were not included), then the true population size of stratum h should be

$$N1h == N_h \times (1 - q_{1h} + q_{2h})$$

and the frame adjustment rate, $W3hk$

$$W3hk = (1 - q_{1h} + q_{2h})$$

In the case of this census, we do not have a measure for q_{2h} . Please note that we could only assume that q_{2h} is almost 0 because list was updated recently.

RESPONSE RATE

TABLE 1 - RESPONSE RATES BY SIZE CLASS OF ESTABLISHMENT

(1) Number of units on Prelisting frame

(x) LT 10 persons engaged = 121,482

(y) ≥ 10 persons engaged = 9,950

(z) Total = 131,432

(2) Number selected or canvass at final census

(x) LT 10 persons engaged = 20,963

(y) ≥ 10 persons engaged = 9,950

(z) Total = 30,913

(3) Number reported at final census

(x) LT 10 persons engaged = 19,974

(y) ≥ 10 persons engaged = 8,312

(z) Total = 28,286

(4) Number of schedules (units) reckoned for tabulation of preliminary results

(x) LT 10 persons engaged = 17,382

(y) ≥ 10 persons engaged = 7,320

(z) Total = 24,702

(5) Response rates 82.9% 73.6% 80.0%

(x) LT 10 persons engaged = 82.9%

(y) ≥ 10 persons engaged = 73.6%

(z) Total = 80.0%

A total of 24,702 establishments furnished satisfactory returns (i.e. returns reckoned for tabulation of preliminary results) and this yielded an overall all-island response rate of 80.00/0 with the corresponding rates for "10 & more persons engaged" category and for the "less than 10 persons" category being 83.4% and 93.5% respectively.

WEIGHTING

The final weight for respondent k in stratum h -- Whk , is a composite of the base weight, $W1hk$ the non-response adjustment, $W2hk$, and the factor to compensate for coverage errors, $W3hk$, such that:

$$Whk = W1hk \times W2hk \times W3hk$$

Base weight ($W1hk$) The base weight is the inverse of the probability of selection.

SUPERVISION

Census Organization

The Hon. Minister of Interior Affairs has directed to conduct the Census of Industries, Trade & Services during the year 2003, by an extra ordinary Gazette notification published (no. 1290/1 1) on 29th May 2003 as per the power vested by him under section 2 of the Census Ordinance (chapter 143) Act, No. 55 of 2000. The Director General of Census and Statistics functioned as Superintendent of Census and was responsible for conducting the Census of Industry. District Secretariats and Mayor of Municipal Councils officiated as Commissioners of census and were responsible for the conduct of census operations within their respective areas of authority. They were assisted in their tasks by Assistant Commissioners who were generally Divisional Secretariats of the divisions in the rural areas, and Secretaries of the local bodies in urban areas. The Directors and Deputy Directors of Census functioned as Deputy Superintendents of Census, while the Deputy Directors, Senior Statisticians, (who performed duties as Coordinators in selected districts) and district Deputy Directors, Senior Statisticians/ Statisticians/ Statistical Officers functioned as Assistant Commissioners of Census. These officers provided the necessary technical and supervisory guidance in all census field operations. In the pre-listing of industrial establishments which was the first stage of the taking of the census (conducted on an all island basis from October to November 2003), the Grama Niladharies functioned as the enumerators in the rural areas, while in the case of urban areas, the local bodies appointed their own field officers as the enumerators. In the final census enumeration Statisticians, Statistical officers of this Department and Data Entry Operator / Coding Clerk / Clerk functioned as the enumerators.

DATA COLLECTION NOTES

Planning and Procedures

This Census was carried out in two stages. The Industrial Registry was updated across the country as the first step. Forms CIL-SNH and CIL-L were used to collect the information in relation to "small" and "medium & large", establishments respectively. A special Form (Form CIL-NE) had to be used to list establishments in Northern & Eastern Provinces where information in some parts of those provinces was not collected through F1 forms during the operation of the Census of Population & Housing - 2001. The second stage was the administration of different types of questionnaires, according to the size categories such as "small" and "medium & large" and sectoral categories such as "Mining & Quarrying", "Manufacturing" and "the Generation and Distribution of Electricity, Gas and Water" etc. defined by the UN. The directory of industrial establishments that was built up on the information compiled from the nation-wide field listing operation indicated that there was a total of approximately 131,432 industrial establishments in the country, of which 9,950 (or 7.6%) were the relatively medium and large scale units (i.e. engaging 10 and more persons). The balance 121,482 were the small scale units (i.e. those engaging less than 10 persons). For the final Census of Industry, it was decided to carry out a complete enumeration of the establishments in the "10 and more persons", category, and a sample enumeration 20,963 establishments of "less than 10" category, which was approximately 16% of the total listed in this latter group.

Questionnaires

QUESTIONNAIRES

After careful field study of the manner in which some large and small scale industrial undertakings maintained their business records, it was decided to use the following three types of census questionnaires for the canvassing of data at the final enumeration.

- (a) Questionnaire CI-2L - The form for enumeration of medium and large scale establishments where detailed information was sought on the full range of items recommended by the UN.
- (b) Questionnaire CI-2S - The form for enumeration of the selected sample - scale establishments.
- (c) Questionnaire CI-MQ - The form for enumeration of Mining and Quarrying establishments.

Access policy

CONFIDENTIALITY

Under the Statistical ordinance, micro data cannot be released with identifications for public use. Procedures are in place to ensure that information relating to any particular individual person, household or undertaking will be kept strictly confidential and will not be divulged to external parties. Information on individual or individual Household/establishment will not be divulged or published in such a form that will facilitate the identification of any particular person or establishment as the data have been collected under the Census/Statistical ordinance, according to which the information at individual level cannot be divulged and such information is strictly confidential.

ACCESS CONDITIONS

The dataset has been anonymized and is available as a Public Use Dataset. It is accessible to all for statistical and research purposes only, under the following terms and conditions:

1. The data and other materials will not be redistributed or sold to other individuals, institutions, or organizations without the written agreement.
2. The data will be used for statistical and scientific research purposes only. They will be used solely for reporting of aggregated information, and not for investigation of specific individuals or organizations.
3. No attempt will be made to re-identify respondents, and no use will be made of the identity of any person or establishment discovered inadvertently.
4. No attempt will be made to produce links among datasets provided by the Department or among data from the Department and other datasets that could identify individuals or organizations.
5. Any books, articles, conference papers, theses, dissertations, reports, or other publications that employ data obtained from the Department will cite the source of data in accordance with the Citation Requirement provided with each dataset.
6. An electronic copy of all reports and publications based on the requested data will be sent to the Department

The following rules apply to micro data released by the Department of Census and Statistics.

- Only the requests of Government Institutions, Recognized Universities, Students, and selected international agencies are entertained. However, the Data users are required to strictly adhere to the terms stipulated in the agreement form.

- All the data requests should be made to Director General (DG) of the DCS as the sole authority of releasing data is vested with the DG of the DCS.

The DCS of Sri Lanka reserves sole right to approve or reject any data request made depending on the confidential nature of the data set and intended purpose of the study or analysis.

- Requests for micro data should be made through the agreement form designed by DCS for this purpose (Form D.R.1). The agreement form should be filled in triplicate and the Study/project proposal should accompany the filled agreement form. If requests are made for the micro data of more than one survey, a separate agreement should be signed.

- If the data request is from a student a letter from the respective Dept. Head/Dean/Supervisor, recommending the issue of data, should also be accompanied.

- If the request is approved only 25% of the data file is released at the first stage. The release of the total data file is considered only after reviewing the draft report prepared on the basis of the 25% sample data file.

- The released Data file should be used only for the specific study/Analysis mentioned in the agreement form and shall not

be used for any other

purpose without the prior approval of the Director General of the DCS. Moreover, Copies of the micro-data file, obtained from the DCS, shall not be

given to anyone else without the prior written approval of the Director General of the DCS.

- The draft report of the Study/Analysis should be submitted to the DCS and the concurrence of the DG of the DCS, should be obtained before publishing it. Once published, a copy of the final report should be submitted to the DCS.

Data Dictionary

Data file	Cases	Variables
3-A_MISCELLNEOUS_PAYMENTS_1 This file contains information pertaining to sub category 2.1.a of Section 2A: Employment, Wages and Salaries (Annual Avg) 2003 (only for gem mining industrialists)	897	19
7-ADDITIONAL_PAYMENTS This file contains data related to the Section 2.3 (Supplement to wages and salaries) of the questionnaire	806	12
4-B_MISCELLNEOUS_PAYMENTS_2 This file contains information pertaining to sub category 2.1.b of Section 2A: Employment, Wages and Salaries (Annual Avg) 2003 (only for gem mining industrialists)	857	13
11-COST_OF_ELECTRICITY This file contains information pertaining to Section 4.3 (Electricity Purchased, Generated, Sold and consumed in 2002 & 2003) of the questionnaire.	10092	14
10-COST_OF_FUEL This file contains information pertaining to Section 4.2 (Cost for fuel 2002 - 2003) of the questionnaire.	26029	15
12-COST_OF_NON_INDUSTRIAL_SERVI This file contains information pertaining to Section 4.4 (Cost of Non-industrial Services Purchased 2003) of the questionnaire.	1682	12
9-COST_OF_RAW_MATERIALS_A This file contains information pertaining to Section 4.1 (Cost of Raw Materials and Services 2003) of the questionnaire.	1663	17
17-DATE_TIME	1688	10
6-EMPLOYEES_PER_QUATERS This file contains information pertaining to sub category 2.2 of Section 2A: Employment, Wages and Salaries (Annual Avg) 2003 (excluding gem mining industrialists)	11444	21
13-GROSS_ADDITION_TO_FIXED_ASSETS This file contains information pertaining to Section 5 (Gross Additions Fixed Assets 2003) of the questionnaire. The figures reported should include the value of all durable goods expected to have a productive life of more than one year intended for use by this establishment. Value of fixed assets should be included. Covered are major additions, alteration and improvements to existing fixed assets. Fixed assets produced by one establishment of a multi establishment enterprise for the use of another establishment of the same enterprise should be valued as though purchased from outside.	8172	13
15-INDUSTRIAL_SERVICES_AND_MIS This file contains the information pertaining to Section 6.2 (Industrial Services and Miscellaneous Receipts - 2003) of the questionnaire.	80	14
16-RECEIPTS_FOR_NON_INDUSTRIAL This file contains information pertaining to Section 6.3 - Receipts for non-industrial and other services during 2003.	879	12
5-SALARIES This file contains information pertaining to sub category 2.1 of Section 2A: Employment, Wages and Salaries (Annual Avg) 2003 (excluding gem mining industrialists)	13251	19
8-STOCKS_SUPPLIE_WORK_PROGRESS This file contains data pertaining to Section 3 (Stocks of this Establishment - 2003) of the questionnaire	5243	11

2-TRADE ACTION

This file contains some information pertaining to Section 1 (Identification Information of Establishment) of the questionnaire.

The information are:-

1.3 Details of industrial activity 1688 18

Main kind of activity such as Gem mining, Sand mining, Stone quarrying etc

Year of commencement of commercial operation

Economic activities being carried out

Products and services

Operation cycle

1-TRADE MQ_REC

This file contains some information pertaining to Section 1 (Identification Information of Establishment) of the questionnaire.

The information are:-

1.1 Geographical Location

The information is very significant in the Census and correct information of the geographical location of the establishment should be entered. The information that should be indicated here must be related to the location of the industry and not at all to the location of the office or the resident of the proprietor. There are six questions to be filled.

1688 16

1.2 General information about the Establishment

Name of the establishment/proprietor/person in charge should be entered. If the industry does not carry a name come under the unspecified category where it includes industries such as gem mining, sand mining, clay mining and quarrying. Indicate the name of the person who takes decisions and operate the industry (in the gem mining owner of the land/active partner licensee may be the person who operate the industry)

14-VALUE_OF_SHIPMENTS_OF_PRODUC

This file contains data related to Section 6.1 (Production and shipments & stocks).

8440 16

Data file: 3-A_MISCELLNEOUS_PAYMENTS_1

This file contains information pertaining to sub category 2.1.a of Section 2A: Employment, Wages and Salaries (Annual Avg) 2003 (only for gem mining industrialists)

Data file: 1-TRADE_MQ_REC

This file contains some information pertaining to Section 1 (Identification Information of Establishment) of the questionnaire.

The information are:-

1.1 Geographical Location

The information is very significant in the Census and correct information of the geographical location of the establishment should be entered. The information that should be indicated here must be related to the location of the industry and not at all to the location of the office or the resident of the proprietor. There are six questions to be filled.

1.2 General information about the Establishment

Name of the establishment/proprietor/person in charge should be entered. If the industry does not carry a name come under the unspecified category where it includes industries such as gem mining, sand mining, clay mining and quarrying. Indicate the name of the person who takes decisions and operate the industry (in the gem mining owner of the land/active partner licensee may be the person who operate the industry)

Description

DEFINITION

2.1.a.1 Working proprietors and active partners

Proprietors and shareholders who are actively engaged in operating, admin activities fall under this category. These persons who are operating with the motive of sharing the profits earned from selling gems may get or not get salary. Exclude

persons who invest their money and get the profits only from selling but are not actively engaged. If some other person is employed in gem mining activities in place of him, that person should be included here. Mostly in the gem mining field, licensed owner of the land and the working partner who incur the capital expenditure get themselves actively engaged in gem mining activities. Include such parties.

2.1.a.2 'Karu Havulkaru'

Include working partner here.

2.1.a.3 Other

Other persons who did not fall under both the above categories and paid workers should be included under this category.

Paid Shares

Include the paying 'Karu Havulkaru' under this category. The person who engaged directly in the quarry would not be received money weekly or daily for their expenses. But do not include the land share('bim panguwa'), machinery share('yanthra suthra panguwa')etc., the shares which are paid to looking proprietors and active partners and shares paid to overseers ('Pathal baas').

Other payments

Salaries and other payments for carrying out mining and quarrying activities, expenditure incurred weekly or monthly on meals should be included under other payments. If meals are provided to workers daily, expenditure incurred should be included under this category. Income obtained from selling 'dalan' which is distributed among shareholders should be included under other payments.

Note: When including the average number of persons engaged, total up the persons engaged in each month in 2003 and divide by 12. Give the quarterly average of persons engaged - total up the number of persons engaged in each month of a quarter and divide by three.

Description

DEFINITION

4.3.1 Electricity purchased - Purchased electricity should be included in the cost of electricity purchased during each year from CEB or other enterprises or received from other establishments of the same enterprise. Please refer monthly electricity bills in order to calculate the annual consumption data.

4.3.2 Generated whether for own use or for sale - If the electricity was generated by your establishment and consumed by the establishment or sold by the same establishment, then include the total cost for generating electricity under this category, valued at the purchasers' price.

4.3.3 Electricity sold and electricity transferred to other establishments of the same enterprise - Enter the value of electricity supplied or sold for other enterprises purchased by your establishment valued at the purchasers' price.

4.3.4 Consumed - Maximum quantity of electricity was consumed by your establishments, other establishments of the same enterprise and sold for other enterprises should be included here. The total of 1) Electricity purchased 2) Generated whether for own use or for sale less 3) Electricity sold and electricity transferred to other establishments of the same enterprise

4.3.5 Maximum quantity of electricity that was consumed by your establishment, other establishments of the same enterprise and sold for other enterprises should be included

4.3.6 Maximum electricity capacity that could be generated by your own generators.

Description

DEFINITION

For other mining activities except for gem mining activities: Do not enter persons who do not involve in production process and who employ in some other sector. [Eg. Exclude workers who break granite for concrete metal. If the owner of the quarry is engaged in breaking granite for concrete metal in addition to quarrying, but if the granite is broken for concrete metal in the same quarry when mining takes place and if both activities are carried out by the same workers, all these workers should be treated as employees.]

2.1.1 Working proprietors and active partners: similar persons who are actively engaged in the operation of this establishment should be included. They may or may not get a salary. Include persons who are engaged in administration and operating activities, if the industry does not exhibit a definite institutional structure, such as sand mining, breaking granite for concrete metal. Include the persons who are employees in place of inactive investors.

2.1.2 Operatives - All employees who are directly engaged in the production or related activity should be included here. This category of employees are broken in to two groups. (skilled & unskilled). Enter the operatives who got special training under 'Skilled' category.

2.1.2.1 Skilled - This refers to persons who are trained or experienced in certain specific fields and covers both manual and mechanical workers who cannot be replaced at short notice. (eg. The person who acts as the overseer in the mine cannot be replaced by some other person, since the activities he does are difficult for some other person to carry out and therefore he should be included under 'skilled'.)

2.1.2.2 Unskilled - An unskilled operator requires no special training or experience to do a job and can be replaced at short notice.

2.1.3.1 Technical and supervisory _ This covers persons involved directly in the technical and supervisory processes. This will cover persons like technicians, quality controllers etc.

2.1.3.2 Clerical and related - This category of persons includes clerical staff, typists, stenographers etc .

2.1.3.3 Others - This should cover all other employees not specified above. (eg. drivers, watchers, security guards, receptionists, peons, sanitary workers etc..) Those persons (1) who do not belong to a category as above but get a payment and the persons (2) who work outside the establishment but get salary from the establishment should be included here.

2.1.3.4 Unpaid family workers - All persons living in the household of proprietors and working in the establishment without regular pay for at least one third of the normal working time of the establishment are considered as unpaid family workers.

Note: Please include all workers whether full or part time including those on sick leave, paid vacation or holidays. For establishments those are in operation in 2003, total up the number in the monthly payroll for 12 months and divide by 12. For quarterly average total up the number of workers per month for relevant three months and divide by 3. For seasonal industries (rubber, brick etc.) the average number of workers is based on that at peak season.

2.3 WAGES AND SALARIES PAID TO EMPLOYEES DURING 2003

This item includes the following classes of payments and relates to "gross" remuneration, i.e. total before any deductions are made by the

employer in respect of taxes, contributions of employees to social security and pension schemes, life insurance premiums, union dues and other obligations of employees.

(a) Direct Wages and Salaries - relates to cash payments for current work performed and includes straight line pay of time-rated workers, incentive pay of time rated workers, earnings of piece rate workers and premium pay for overtime, late shift and holiday work. Also included are commissions, responsibility premiums, dirt and discomfort allowances, cash indemnities, payments and under guaranteed pay systems, cost-of-living allowances and other regular allowances.

(b) Remuneration for Time not Worked - comprises cash payments in respect of public holidays, annual vacations and other-time off with pay.

(c) Bonuses and Gratuities - include year-end and seasonal as well as production and profit sharing bonuses.

(d) Payments in Kind - these are goods and services furnished to employees free of charge or at markedly reduced cost which are clearly and primarily of benefit to employees as consumers. They comprise food including the supply of milk, rice, flour, tea, etc., drink, fuel and other payments in kind.

Description

DEFINITION

5.1 The fixed assets acquired from others should be valued at purchasers' prices. These values comprise cost of purchase of the fixed asset on the market, customs duties, purchase and other indirect taxes and fees paid to government, transport delivery and installation charges, direct preliminary outlay such as site clearance and professional fees. The cost of fixed assets acquired during the year that have not been previously used in Sri Lanka should be included in this category.

5.2 Second hand fixed assets purchased - Include all assets that have been previously used in Sri Lanka.

5.3 Include the cost of major addition, alterations and improvement existing fixed assets that are charge to capital assets, exclude expenditure for current maintenance and repair.

5.4 Include the cost of fixed assets produced on own accounts i.e. the value of new fixed assets and additions and improvement to existing fixed assets made by the establishment's own labour force report either the cost of labour materials consumed and appropriate overheads or charge made to capital (fixed assets) accounts.

5.5 Sales of fixed assets should be value of the actual amounts realised rather than at book value.

5.6 Sum of New fixed assets, Second hand fixed assets, Alterations, Own-account FA's, Value of sale of FA's

Description

DEFINITION

For other mining activities except for gem mining activities: Do not enter persons who do not involve in production process and who employ in some other sector. [Eg. Exclude workers who break granite for concrete metal. If the owner of the quarry is engaged in breaking granite for concrete metal in addition to quarrying, but if the granite is broken for concrete metal in the same quarry when mining takes place and if both activities are carried out by the same workers, all these workers should be treated as employees.]

2.1.1 Working proprietors and active partners: similar persons who are actively engaged in the operation of this establishment should be included. They may or may not get a salary. Include persons who are engaged in administration and operating activities, if the industry does not exhibit a definite institutional structure, such as sand mining, breaking granite for concrete metal. Include the persons who are employees in place of inactive investors.

2.1.2 Operatives - All employees who are directly engaged in the production or related activity should be included here. This category of employees are broken in to two groups. (skilled & unskilled). Enter the operatives who got special training under 'Skilled' category.

2.1.2.1 Skilled - This refers to persons who are trained or experienced in certain specific fields and covers both manual and mechanical workers who cannot be replaced at short notice. (eg. The person who acts as the overseer in the mine cannot be replaced by some other person, since the activities he does are difficult for some other person to carry out and therefore he should be included under 'skilled'.)

2.1.2.2 Unskilled - An unskilled operator requires no special training or experience to do a job and can be replaced at short notice.

2.1.3.1 Technical and supervisory _ This covers persons involved directly in the technical and supervisory processes. This will cover persons like technicians, quality controllers etc.

2.1.3.2 Clerical and related - This category of persons includes clerical staff, typists, stenographers etc .

2.1.3.3 Others - This should cover all other employees not specified above. (eg. drivers, watchers, security guards, receptionists, peons, sanitary workers etc..) Those persons (1) who do not belong to a category as above but get a payment and the persons (2) who work outside the establishment but get salary from the establishment should be included here.

2.1.3.4 Unpaid family workers - All persons living in the household of proprietors and working in the establishment without regular pay for at least one third of the normal working time of the establishment are considered as unpaid family workers.

Note: Please include all workers whether full or part time including those on sick leave, paid vacation or holidays. For establishments those are in operation in 2003, total up the number in the monthly payroll for 12 months and divide by 12. For quarterly average total up the number of workers per month for relevant three months and divide by 3. For seasonal industries (rubber, brick etc.) the average number of workers is based on that at peak season.

2.3 WAGES AND SALARIES PAID TO EMPLOYEES DURING 2003

This item includes the following classes of payments and relates to "gross" remuneration, i.e. total before any deductions are made by the employer in respect of taxes, contributions of employees to social security and pension schemes, life insurance premiums, union dues and other obligations of employees.

(a) Direct Wages and Salaries - relates to cash payments for current work performed and includes straight line pay of time-rated workers, incentive pay of time rated workers, earnings of piece rate workers and premium pay for overtime, late shift and holiday work. Also included are commissions, responsibility premiums, dirt and discomfort allowances, cash indemnities, payments and under guaranteed pay systems, cost-of-living allowances and other regular allowances.

(b) Remuneration for Time not Worked - comprises cash payments in respect of public holidays, annual vacations and other-time off with pay.

(c) Bonuses and Gratuities - include year-end and seasonal as well as production and profit sharing bonuses.

(d) Payments in Kind - these are goods and services furnished to employees free of charge or at markedly reduced cost which are clearly and primarily of benefit to employees as consumers. They comprise food including the supply of milk, rice, flour, tea, etc., drink, fuel and other payments in kind.

Description

DEFINITION

This item comprises the value of all stocks owned by the parent enterprise and held by, or under the control of the establishment, either at the establishment or elsewhere. Stocks held at ancillary units, in bonded stores or public warehouses on consignment in transit and held by others for processing on commission are included. Excluded materials owned by others but held by this establishment for processing. In general stocks acquired from others should be valued at purchasers prices and those produced internally at producers' prices.

3.1. Raw Materials, components.....

This item comprises all materials, components, etc. that enter into the product, fuels, repair and maintenance, and office and other consumable supplies. The value of any stocks of materials and supplies for use in own-account fixed asset should be included. Stocks should be valued at current replacement cost, based on purchasers prices. The prices should include any duties and taxes payable and should be net of any rebates and discounts given by the seller. Alternatively, book values might be reported.

3.2. Work-in-progress - refers to the value of all materials which have been partially processed by this establishment but which are not usually sold, shipped or turned over to other establishments without further processing. An imputed valuation in terms of producers prices should be adopted, including an imputed margin for overhead costs and profits as well as the cost of materials consumed and labour used. Alternatively, book values might be reported.

3.3 Finished goods - This item covers finished goods manufactured by this establishment which are ready for shipment at the reference dates. Finished goods held by another establishment those were processed by the establishment from raw materials controlled by this establishment, as well as goods held at ancillary units, in bonded or public warehouses, on consignment, in transit, etc., should also be included. Finished goods held by this establishment which were made from materials owned by others should be excluded. Valuation should be in producers prices at which similar goods have been shipped alternatively book values might be reported.

3.4 Goods to be sold under the same condition as purchased - This item covers the value of any stocks of goods that the establishment has bought with the intention of reselling in the same form, that is without further processing. Stocks of materials and supplies to be resold without further processing should also be included. Valuation of stocks should be valued at same price as goods that have been shipped immediately prior to the reference date. Beginning and end of year stocks should be valued using the same prices.

3.5 Total stocks (3.1, ... 3.4)
