Sri Lanka (2003)

Census of Industry - 2004 [Small Scale Establishments] (CI2S 2004)

Overview	
Type	Enterprise Census [en/census]
Identification	LKA-DCS-CI2S-2004-v1.0
Version	Production Date: 2004 Version 1.0 : Full edited dataset, for internal DPD use
Series	<p>The Census of Industry carried out by the Department of Census and Statistics (DCS) in 2003/2004 is the sixth industrial census in a series of Industrial Censuses conducted by the DCS since 1946.</p> <p>With the steady increase in industrial activities and the outstanding recognition of the importance of industrial statistics for the purpose of planning, policy making, investment promotion and research etc. the conduct of Census of Industry is important. Industry Census provides reliable and detailed benchmark statistics on the size, distribution and types of industries.</p> <p>The Census of Industry 2003/2004 was a major statistical event of importance, since it was taken twenty years after the last Industrial Census of 1983 and to assess the current situation of industrial sector in the context of the policy of liberalization of the country's economy introduced in 1977.</p> <p>The Census covered establishments engaged in</p> <ol style="list-style-type: none"> 1. Mining and Quarrying, 2. Manufacturing and 3. Generation and Distribution of Electricity, Gas and Water <p>as per the Economic Activities represented by the United Nations International Standard Industrial Classification (ISIC) Revision 3.</p>
<p><u>Abstract</u></p> <p>The Census of industry 2004 covered establishments engaged in the economic activities of</p> <ol style="list-style-type: none"> 1. Mining & quarrying 2. Manufacturing 3. Generation and Distribution of Electricity, Gas and Water <p>Three questionnaires Long Form, Short Form and M&Q Form were used to canvass Large and Medium scale industrial establishments, Small scale establishments and Mining and Quarrying establishments respectively.</p> <p>The final Census was conducted during October - November 2004 by posting the questionnaires to approximately 9000 large and medium scale industrial (person engaged 10 and more) establishments and by personally visiting approximately 21000 establishments which is a representative sample of small scale industries (persons engaged less than 10).</p> <p>The Department of Census and Statistics (DCS) usually conducts Census of Industry once in ten years in order to have a full coverage of industrial establishments within the territorial boundary of Sri Lanka. The earliest attempt</p>	

made at seeking information from the industrial sector was in the "Census of Agriculture and Industries", which was conducted in conjunction with the Population Census in 1946. With the steady increase in industrial activities in Sri Lanka and the growing recognition of the importance of industrial statistics for the purposes of planning, a systematic attempt was made to collect data on industrial production through the Census of Industry in 1952.

This covered Mining and Quarrying, Manufacturing, Electricity and Gas and also Construction. The Census of Industry, 1952 was confined only to the factory type of establishments, i.e. industrial establishments which had not less than 5 paid employees and which had employed a capital of not less than Rs. 3,000 and used mechanical power in any of its production processes. Among the major agro-based export industries, coconut and oil milling were covered in the 1952 census, while tea factories and rubber mills were excluded, and brought instead within the scope of the Census of Agriculture.

The next Census of Industry was conducted in 1964, the scope and coverage of which was similar to that of the 1952 census. The frame for this census was based on a list of buildings prepared for the Census of Population 1963. However, there was considerable difficulty in identifying the buildings in which industrial activities were carried out. As a result the list of industrial establishments compiled on this basis did not provide a satisfactory frame to determine the overall magnitude of "factory establishments" in the industrial sector. The results as analyzed from the limited number of census returns received, could thus prove to be inadequate for depicting a sufficiently realistic picture of the level and structure of industrial activity in the country.

The Census of Industry conducted by the Department of Census & Statistics in 1983 in accordance with the United Nations program was the last Census of Industry. The 1983 Census of Industry, consisted of two stages and in the first stage, information relating to industries included in the pre-listing schedule F1, in which all buildings were listed in the Census of Population and Housing in 1981, was copied into a separate form and updated depending on the nature of Industry and the number of employees engaged.

In 1983 Sri Lanka participated in the 1983 world programmed Industrial Statistics by carrying out a Census of Industry, on a nation - wide scale. The DCS was supposed to have undertaken the Census of Industry in 1993, but had to postpone until 2003 due to the prolonged unrest prevailed in certain areas of the country.

The Census of Industry held in 2004 is the sixth of its kind in a series of Industrial Censuses conducted by the Department of Census and Statistics for over nearly six decades. It covers establishments engaged in the activities of Mining and Quarrying, Manufacturing and the Generation and Distribution of Electricity, Gas and Water according to the International Standard Industrial Classification (ISIC) Revision - 3 of the United Nations (UN).

Kind of Data	Sample survey data [ssd]
Unit of Analysis	<p>A questionnaire has to be completed for each establishment (plant, factory, mill, mine, workshop etc.) or jointly for a group of establishments on one site or several sites in the same Grama Niladhari division or ward under one accounting system.</p> <p>A qualified establishment has its own manufacturing facility its own accounting and a distinct management and location</p> <p>Ancillary units including administrative offices, warehouses, such as garages, repair shops(which primarily serve the production units) should be treated as part of the establishment.</p> <p>Industrial establishments - Defined as the unit directed by a single owning or controlling</p>

	<p>entity that is engaged in the production of the most homogeneous group of goods and services, usually at one location but sometimes over a wider area, for which separate records are available(eg. plant, factory, mill, mine, workshop etc)</p> <p>In cases where industrial enterprises were engaged in the production of more than one homogeneous group of goods and services in different locations, separate returns were generally obtained for each such product group and location. In cases where establishments operated by a single owner or enterprise was located within the area of one GS Division or Ward, these several units could furnish a single return and this would be reckoned as one establishment.</p> <p>Ancillary units including warehouses, garages repair shops electric plants which primarily served the needs of a single establishment, if they were in the same site within the same GS division , or Ward were treated as part of the main establishment. Otherwise these were treated as separate establishments but classified to the same industry as the parent establishment.</p>
--	---

Scope & Coverage

Scope

The scope of the census includes:-

1. Identification Information of Establishment

- 1.1 Geographical Location
- 1.2 General Information about the Establishment
- 1.3 Details of Industrial Activity

2. Employment, Wages and salaries 2003

- 2.1 Persons Engaged, Wages and salaries (Annual Average) - 2003
- 2.2 Persons engaged (Quarterly average) - 2003
- 2.3 Supplements to Wages and salaries - 2003

3. Stocks, Supplies and WIP - 2003

- 3.1 Stocks of this Establishment - 2003

4. Input Costs

- 4.1 Cost of Raw Materials and Services - 2003
- 4.2 Cost for Fuel
- 4.3 Cost for electricity
- 4.4 Cost for Non- Industrial Services

5. Gross Addition to Fixed Assets - 2003

6. Production, Industrial Services and Other Receipts - 2003

- 6.1 Production and Shipments & Stocks of Materials - 2003
- 6.2 Industrial Services and Miscellaneous Receipts - 2003
- 6.3 Receipts for Non-Industrial and Other Services During - 2003

Industrial censuses are infrequent inquiries conducted in many countries once every five or ten years and are usually aimed at a full coverage of industrial establishments within the territorial boundaries of the country.

The broad objectives of the 2003/2004 Census of Industry were

- (a) to provide measures of the principal indicators of economic activity for the census reference year 2003
- (b) to provide measures that would serve as a "bench-mark" (defined as a complete count or record of objects of statistical interest, at a specific date), for other surveys and for the construction of indices of production etc.
- (c) to develop a comprehensive register of industrial establishments which would serve as an efficient frame for annual, quarterly and monthly inquiries into the structure of activities in the industrial sector,
- (d) to ensure that the concepts and standards of industrial statistics compilation in Sri Lanka fall in line with international recommendations and standards.

The census covered the industrial sector of Sri Lanka, comprising establishments engaged primarily in the activities of Mining and Quarrying, Manufacturing, and of the Generation and Distribution of Electricity, Gas and Water. A complete coverage of all identifiable industrial establishments in the country was not considered feasible

due to financial and operational constraints. Hence the enumeration plan called for coverage of all establishments above a designated employment cut-off point and a sample of smaller establishments. It was decided to enumerate all establishments engaging 10 or more persons engaged, to enable estimates to be prepared that would be as close to the universe as was possible.

Keywords	Shipments and Other Receipts, Gross Output at Producer's Prices, Estimates of Value Added, Employment, Wages and Salaries, Supplements to Wages and salaries, Input Costs, Stocks, Gross Fixed Capital Formation
Topics	TRADE, INDUSTRY AND MARKETS [2], LABOUR AND EMPLOYMENT [3]

Geographic Coverage

National Coverage.

The target population for this questionnaire was a sample of establishments (those with less than 10 persons engaged) in Sri Lanka that are engaged in the production of one class of homogeneous goods in the field of

- (a) Mining and Quarrying
- (b) Manufacturing
- (c) The generation and distribution of electricity and water

Universe

The census covered establishments engaged primarily in the activities of Mining and Quarrying, Manufacturing and the production and distribution of Electricity, Gas and water which correspond to major divisions 2,3 and 4 respectively of the UN classification of ISIC and represented the industrial sector specified for census coverage.

The questionnaire (called Short Form) to which this data set belongs was administered to a sample selected from all establishments having less than 10 persons employed.

Sampling

Sampling Procedure

In October-November 2003, DCS conducted a listing operation of Census of Industry prior to the canvass of detailed information on establishments. The census registry was based mainly on notations made during door-to-door canvassing in mid 2000 for the Census of Population and Housing. List of Establishments by Grama Niladhari Divisions were sent in latter part of 2003 to each Grama Niladhari with a request to be updated for industrial establishments (mostly newer ones) that were lacking in 2001, the closures of older ones and for some changes on establishments. The updated list of all industrial establishments was employed as the sampling frame. The whole frame was divided into two groups as establishments with less than 10 persons engaged (Small establishments) and establishments with 10 and more persons engaged (Medium and Large establishments). The small establishments that had less than 10 persons engaged was further divided into two groups as establishments with less than 30 same type of industries (ISIC 4 digits level) and establishments with 30 and more same type of industries (ISIC 4 digits level) in each district.

A total of 30,913 establishments were selected. Those 9,950 establishments that have 10 and more persons engaged were selected with certainty. The small establishments with less than 30 same kind of industries were

selected with certainty totaling 9089 while others (i.e. establishment with 30 and more same kind of industries) were selected by using the stratified simple random sample design. In general, strata were defined by the kind of industries at ISIC 4 digits level and district groups. In absence of any other auxiliary variables in the list frame that could be used in the sample allocation and selection, sample sizes across strata were determined using proportional allocation. That is, if N_h is the population size in stratum h and N is the population size, the first iteration sample size n_h in stratum h is derived by

$$n_h = N_h \times 11874 / N$$

Deviations from Sample Design

The non-response weight is the ratio the sample size to the total respondents. The establishments that were considered as non-respondents are those who refused to participate in the Census. The following are considered with frame problems:

those establishments that cannot be located, those that were closed (they should not be included in the sampling frame), those that are out-of-scope (the ISIC classification was not specified correctly) and those that were duplicates and mergers.

Of the small establishments with 30 and more same kind of industries in the sampling frame, 10.9% should not have been included. This is rather a big percentage of the such small establishments and therefore, requires an adjustment factor to be incorporated in the weight. To illustrate, if N_h is the population size for stratum h and n_h is the corresponding sample size, then the corresponding selection probability P_h is

$$P_h = n_h / N_h$$

If given the stratum h , q_{1h} is the proportion of establishments with frame problems (proportion of those that should not be included in the frame) and q_{2h} is the proportion of establishments that were missed in the frame (those that should be listed but were not included), then the true population size of stratum h should be

$$N_{1h} = N_h \times (1 - q_{1h} + q_{2h})$$

and the frame adjustment rate, W_{3hk}

$$W_{3hk}$$

$$= (1 - q_{1h} + q_{2h})$$

In the case of this census, we do not have a measure for q_{2h} . Please note that we could only assume that q_{2h} is almost 0 because list was updated recently.

Response Rate

TABLE 1 - RESPONSE RATES BY SIZE CLASS OF ESTABLISHMENT

(1) Number of units on Prelisting frame

(x) LT 10 persons engaged = 121,482
 (y) ≥ 10 persons engaged = 9,950
 (z) Total = 131,432

(2) Number selected or canvass at final census

(x) LT 10 persons engaged = 20,963
 (y) ≥ 10 persons engaged = 9,950

(z) Total = 30,913

(3) Number reported at final census

(x) LT 10 persons engaged = 19,974

(y) ≥ 10 persons engaged = 8,312

(z) Total = 28,286

(4) Number of schedules (units) reckoned for tabulation of preliminary results

(x) LT 10 persons engaged = 17,382

(y) ≥ 10 persons engaged = 7,320

(z) Total = 24,702

(5) Response rates 82.9% 73.6% 80.0%

(x) LT 10 persons engaged = 82.9%

(y) ≥ 10 persons engaged = 73.6%

(z) Total = 80.0%

A total of 24,702 establishments furnished satisfactory returns (i.e. returns reckoned for tabulation of preliminary results) and this yielded an overall all-island response rate of 80.00/0 with the corresponding rates for "10 & more persons engaged" category and for the "less than 10 persons" category being 83.4% and 93.5% respectively.

Weighting

The final weight for respondent k in stratum h -- Whk, is a composite of the base weight, W1hk the non-response adjustment, W2hk, and the factor to compensate for coverage errors, W3hk, such that:

$$Whk = W1hk \times W2hk \times W3hk$$

Base weight (W1hk) The base weight is the inverse of the probability of selection.

Data Collection

Data Collection Dates	start 2003-10 end 2003-11
-----------------------	------------------------------

Data Collection Mode	Face-to-face [f2f]
----------------------	--------------------

Data Collection Notes

Planning and Procedures

This Census was carried out in two stages. The Industrial Registry was updated across the country as the first step. Forms CIL-SNH and CIL-L were used to collect the information in relation to "small" and "medium & large", establishments respectively. A special Form (Form CIL-NE) had to be used to list establishments in Northern & Eastern Provinces where information in some parts of those provinces was not collected through F1 forms during the operation of the Census of Population & Housing - 2001. The second stage was the administration of different types of questionnaires, according to the size categories such as "small" and "medium & large" and sectoral categories such as "Mining & Quarrying", "Manufacturing" and "the Generation and Distribution of Electricity, Gas and Water" etc. defined by the UN. The directory of industrial establishments that was built up on the information compiled from the nation-wide field

listing operation indicated that there was a total of approximately 131,432 industrial establishments in the country, of which 9,950 (or 7.6%) were the relatively medium and large scale units (i.e. engaging 10 and more persons). The balance 121,482 were the small scale units (i.e. those engaging less than 10 persons). For the final Census of Industry, it was decided to carry out a complete enumeration of the establishments in the "10 and more persons", category, and a sample enumeration 20,963 establishments of "less than 10" category, which was approximately 16%) of the total listed in this latter group.

Questionnaires

After careful field study of the manner in which some large and small scale industrial undertakings maintained their business records, it was decided to use the following three types of census questionnaires for the canvassing of data at the final enumeration.

- (a) Questionnaire CI-2L - The form for enumeration of medium and large scale establishments where detailed information was sought on the full range of items recommended by the UN.
- (b) Questionnaire CI-2S - The form for enumeration of the selected sample - scale establishments.
- (c) Questionnaire CI-MQ - The form for enumeration of Mining and Quarrying establishments.

Supervision

Census Organization

The Hon. Minister of Interior Affairs has directed to conduct the Census of Industries, Trade & Services during the year 2003, by an extra ordinary Gazette notification published (no. 1290/1 1) on 29th May 2003 as per the power vested by him under section 2 of the Census Ordinance (chapter 143) Act, No. 55 of 2000. The Director General of Census and Statistics functioned as Superintendent of Census and was responsible for conducting the Census of Industry. District Secretariats and Mayor of Municipal Councils officiated as Commissioners of census and were responsible for the conduct of census operations within their respective areas of authority. They were assisted in their tasks by Assistant Commissioners who were generally Divisional Secretariats of the divisions in the rural areas, and Secretaries of the local bodies in urban areas. The Directors and Deputy Directors of Census functioned as Deputy Superintendents of Census, while the Deputy Directors, Senior Statisticians, (who performed duties as Coordinators in selected districts) and district Deputy Directors, Senior Statisticians/ Statisticians/ Statistical Officers functioned as Assistant Commissioners of Census. These officers provided the necessary technical and supervisory guidance in all census field operations. In the pre-listing of industrial establishments which was the first stage of the taking of the census (conducted on an all island basis from October to November 2003), the Grama Niladharies functioned as the enumerators in the rural areas, while in the case of urban areas, the local bodies appointed their own field officers as the enumerators. In the final census enumeration Statisticians, Statistical officers of this Department and Data Entry Operator / Coding Clerk / Clerk functioned as the enumerators.

Accessibility

Access Authority	Director General (Department of Census and Statistics) , http://www.statistics.gov.lk , dgcensus@slt.net.lk
Contact(s)	Information Unit (Department of Census and Statistics) , http://www.statistics.gov.lk , information@statistics.gov.lk Industrial & Construction Division (Department of Census and Statistics) , http://www.statistics.gov.lk , industries@statistics.gov.lk

Confidentiality

Under the Statistical ordinance, micro data cannot be released with identifications for public use. Procedures are in place to ensure that information relating to any particular individual person, household or undertaking will be kept strictly confidential and will not

be divulged to external parties.

Information on individual or individual Household/establishment will not be divulged or published in such a form that will facilitate the identification of any particular person or establishment as the data have been collected under the Census/Statistical ordinance, according to which the information at individual level cannot be divulged and such information is strictly confidential.

Access Conditions

The dataset has been anonymized and is available as a Public Use Dataset. It is accessible to all for statistical and research purposes only, under the following terms and conditions:

1. The data and other materials will not be redistributed or sold to other individuals, institutions, or organizations without the written agreement.
2. The data will be used for statistical and scientific research purposes only. They will be used solely for reporting of aggregated information, and not for investigation of specific individuals or organizations.
3. No attempt will be made to re-identify respondents, and no use will be made of the identity of any person or establishment discovered inadvertently.
4. No attempt will be made to produce links among datasets provided by the Department or among data from the Department and other datasets that could identify individuals or organizations.
5. Any books, articles, conference papers, theses, dissertations, reports, or other publications that employ data obtained from the Department will cite the source of data in accordance with the Citation Requirement provided with each dataset.
6. An electronic copy of all reports and publications based on the requested data will be sent to the Department

The following rules apply to micro data released by the Department of Census and Statistics.

- Only the requests of Government Institutions, Recognized Universities, Students, and selected international agencies are entertained. However, the Data users are required to strictly adhere to the terms stipulated in the agreement form.
- All the data requests should be made to Director General (DG) of the DCS as the sole authority of releasing data is vested with the DG of the DCS.
The DCS of Sri Lanka reserves sole right to approve or reject any data request made depending on the confidential nature of the data set and intended purpose of the study or analysis.
- Requests for micro data should be made through the agreement form designed by DCS for this purpose (Form D.R.1). The agreement form should be filled in triplicate and the Study/project proposal should accompany the filled agreement form. If requests are made for the micro data of more than one survey, a separate agreement should be signed.
- If the data request is from a student a letter from the respective Dept. Head/Dean/Supervisor, recommending the issue of data, should also be

accompanied.

- If the request is approved only 25% of the data file is released at the first stage. The release of the total data file is considered only after reviewing the draft report prepared on the basis of the 25% sample data file.

- The released Data file should be used only for the specific study/Analysis mentioned in the agreement form and shall not be used for any other purpose without the prior approval of the Director General of the DCS. Moreover, Copies of the micro-data file, obtained from the DCS, shall not be given to anyone else without the prior written approval of the Director General of the DCS.

- The draft report of the Study/Analysis should be submitted to the DCS and the concurrence of the DG of the DCS, should be obtained before publishing it. Once published, a copy of the final report should be submitted to the DCS.

Files Description

Dataset contains 9 file(s)

Section1	
# Cases	16522
# Variable(s)	26
<u>File Content</u> This file contains the information pertaining to the Section 1 of the questionnaire Identification Information of Establishment which is subdivided into: <ul style="list-style-type: none"> 1.1 Geographical Information 1.2 General Information about the establishment 1.3 Details of Industrial Activity 	

Section2	
# Cases	16496
# Variable(s)	179
<u>File Content</u> This file contains data related to the Section 2 of the questionnaire - Employment , Wages and salaries 2003. The Section 2 of the questionnaire has a two tables to be filled 1) Persons engaged, wages and salaries (Annual average) 2003 and 2) Persons Engaged - 2003 (Quarterly Average) Table 1 has 90 cells to be filled and the Table 2 has 72 cells to be filled if information is available.	
<u>Notes</u> Enter the number of persons engaged in the activities of this establishment during the year 2003. Please supply separate figures for males and females. Don't enter the employers, who don't involve in the production process. Employees involved in agriculture, plantation fishery sectors, should be excluded. Ex. If it is a tea factory or rubber factory estate workers should be excluded. If meat and fish are being canned, then fishermen and livestock breeders should be excluded. Note : Please include all workers whether full time and part time including those on sick leave, paid vacation or holidays. For establishments those are in operation during the survey year, total up the number in the monthly pay roll for twelve months and divide by 12. For quarterly average, total up the number of workers per month for relevant three months and divide by three. For seasonal industries (rubber, brick etc.) the average number of workers based on that at peak season.	

Section3	
# Cases	11459
# Variable(s)	18
<u>File Content</u> This file contains data pertaining to the Section 3 (Stocks of this establishment - 2003) of the questionnaire. Each questionnaire produces at most ten records corresponding to each cell in the table to be filled.	

Section41	
# Cases	16343
# Variable(s)	18
<u>File Content</u> This file contains data pertaining to Section 4.1 of the questionnaire - cost of Raw Materials and Services. This section covers all input of goods and service. Valuation should be in purchasers' prices, including purchase price, transport charges either invoiced by the producer or by other organization, the value of packaging materials charged for, all taxes and duties on the goods. Discounts or rebates allowed to the purchaser should be deducted. Goods received by the establishment from other establishments of the same enterprise should be valued as if purchased.	

Section42	
# Cases	19191
# Variable(s)	14
<u>File Content</u> This file contains the data filled in the table named as Cost for Fuel in Section 4.2. Items from Furnace oil to Kerosene have been considered in this file. This file contains as many records as there are entry lines. 4.2 Cost for Fuel 4.2.1- 4.2.15 Vehicle fuels are also included. Excluded are fuels used as direct material (e.g. Naptha) or consumed for the generation of electricity. Also excluded is the cost of fuels, such as saw dust or blast furnace gas, produced as a by-product of manufacturing activity in this establishment. If the given unit of measure is not available, please specify available unit of measure in column 3 Valuation should be in purchased prices	

Section43	
# Cases	16522
# Variable(s)	44
<u>File Content</u> This file contains data pertaining to the tables 4.3a, 4.3b and 4.4 of the questionnaire Cost of Electricity 2002, Cost of Electricity 2003 and Cost of Non Industrial services respectively. i. e. Electricity purchased, Generated, Sold and Consumed during 2002 & 2003 Cost of non-industrial services such as Communication, Rent and other costs are included.	

Section5	
# Cases	7193
# Variable(s)	35
<u>File Content</u> This file contains data pertaining to Section 5 - Gross Addition to fixed Assets The figures reported should include the value of all durable goods expected to have a productive life of more than one year intended for use by this establishment. Value of fixed assets should be included. Covered are major additions, alteration and improvements to existing fixed assets. Fixed assets produced by one establishment of a multi establishment enterprise for the use of another establishment of the same enterprise should be valued as though purchased from outside.	

Section6	
# Cases	16496
# Variable(s)	75
<u>File Content</u> This file contains data related to Section 6 of the questionnaire - Production, Industrial Services and Other receipts 2003. This has three subsections 6.1 - Production and Shipment of Stocks of Materials - 2003 6.2 - Industrial Services and Miscellaneous Receipts - 2003 6.3 - Receipts for Non-Industrial and Other Services during 2003	

Section7	
# Cases	16522

Variables Description

Dataset contains 431 variable(s)

File Section1

#1 REC\$TYPE

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=16522 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1		16522	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#2 REFNO: Reference number

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=16522 /-] [Invalid=0 /-]

#3 Q11A: Province

Information	[Type= continuous] [Format=numeric] [Range= 11-21] [Missing=*]
Statistics [NW/ W]	[Valid=16512 /-] [Invalid=10 /-] [Mean=43.297 /-] [StdDev=26.701 /-]

#4 Q11B: DS Division

Information	[Type= continuous] [Format=numeric] [Range= 3-38] [Missing=*]
Statistics [NW/ W]	[Valid=16513 /-] [Invalid=9 /-] [Mean=24.218 /-] [StdDev=16.49 /-]

#5 Q11C: GN Division

Information	[Type= continuous] [Format=numeric] [Range= 5-405] [Missing=*]
Statistics [NW/ W]	[Valid=16514 /-] [Invalid=8 /-] [Mean=137.06 /-] [StdDev=108.357 /-]

#6 Q11D: Sector

Information	[Type= continuous] [Format=numeric] [Range= 1-3] [Missing=*]
Statistics [NW/ W]	[Valid=16512 /-] [Invalid=10 /-]

Value	Label	Cases	Percentage
1	Urban	2135	12.9%
2	Rural	14295	86.6%
3	Estate	81	0.5%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

Literal question	Other products Value in Rs. 31-12-03

#61 Q61186: 6.1.1.8 Total value shipment(Rs.'000) 2003/01/01

Information	[Type= continuous] [Format=numeric] [Range= 75-2153460] [Missing=*]
Statistics [NW/ W]	[Valid=6244 /-] [Invalid=10252 /-] [Mean=36083.991 /-] [StdDev=124191.146 /-]
Literal question	Total Value in Rs. 01-01-03

#62 Q61188: 6.1.1.8 Total value shipment(Rs.'000) 2003/12/31

Information	[Type= continuous] [Format=numeric] [Range= 80-2382300] [Missing=*]
Statistics [NW/ W]	[Valid=6639 /-] [Invalid=9857 /-] [Mean=41290.217 /-] [StdDev=139009.155 /-]
Literal question	Total Value in Rs. 31-12-03

#63 Q621: 6.2.1 Value(Rs.'000)

Information	[Type= continuous] [Format=numeric] [Range= 1500-2500000] [Missing=*]
Statistics [NW/ W]	[Valid=4417 /-] [Invalid=12079 /-] [Mean=111627.928 /-] [StdDev=251777.586 /-]
Pre-question	6.2.1 Report the value at actual invoice prices. of contract and commission work done for others in material owned by them during the reference year.
Literal question	Receipt for contract work done for others on their materials

#64 Q622: 6.2.2 Value(Rs.'000)

Information	[Type= continuous] [Format=numeric] [Range= 600-1300000] [Missing=*]
Statistics [NW/ W]	[Valid=1655 /-] [Invalid=14841 /-] [Mean=74236.421 /-] [StdDev=252425.658 /-]
Pre-question	6.2.2 Report the value. at actual invoice prices of repair. maintenance and installation work rendered to other enterprises or to other establishments of the same enterprise or to individual customers
Literal question	Receipts for repairs and installation work done for others

#65 Q623: 6.2.3 Value(Rs.'000)

Information	[Type= continuous] [Format=numeric] [Range= 750-200000] [Missing=*]
Statistics [NW/ W]	[Valid=1550 /-] [Invalid=14946 /-] [Mean=24748.939 /-] [StdDev=140138.587 /-]
Pre-question	6.2.3 This item covers industrial work done and services rendered excluding those reported under 6.2.1 & 6.2.2. Include the value of scrap and refuse etc.
Literal question	Receipts for industrial services, including sales of scrap and refuse etc

File Section6 (cont.)

#66 Q624: 6.2.4 Value(Rs.'000)

Information	[Type= continuous] [Format=numeric] [Range= 2000-3100000] [Missing=*]
Statistics [NW/ W]	[Valid=596 /-] [Invalid=15900 /-] [Mean=348344.493 /-] [StdDev=890918.035 /-]
Pre-question	6.2.4 Goods shipped in the same condition as purchased should be valued in the same way as goods produced by this establishment. i.e. the invoice value including taxes.
Literal question	Sales of goods bought and sold in the same condition

#67 Q625: 6.2.5 Value(Rs.'000)

Information	[Type= continuous] [Format=numeric] [Range= 4000-1200000] [Missing=*]
Statistics [NW/ W]	[Valid=233 /-] [Invalid=16263 /-] [Mean=63239.721 /-] [StdDev=219229.357 /-]
Pre-question	Include the cost of all equipment (including plant etc.) building and other constructions manufactured or build by the establishment for its own use during the census reference period. as well as the costs of extensions, alterations, improvements and major repairs carried out by this establishment with own labour which prolong the life of existing fixed assets. Valuation should be at producers' prices or at direct cost plus appropriate portion of overheads.
Literal question	Total cost of own-account fixed assets produced

#68 Q626: 6.2.6 Total(6.2.1 to 6.2.5) in(Rs.'000)

Information	[Type= continuous] [Format=numeric] [Range= 600-3100000] [Missing=*]
Statistics [NW/ W]	[Valid=6536 /-] [Invalid=9960 /-] [Mean=133799.779 /-] [StdDev=385974.188 /-]
Literal question	Total of 6.2.1 - 6.2.5

#69 Q631: 6.3.1 Value(Rs.'000)

Information	[Type= continuous] [Format=numeric] [Range= 2000-300000] [Missing=*]
Statistics [NW/ W]	[Valid=100 /-] [Invalid=16396 /-] [Mean=73739.43 /-] [StdDev=189310.005 /-]
Definition	<p>6.3 - Receipts for non-Industrial and other services - 2003</p> <p>Summarized below are some categories of revenue from non industrial services to guide you in reporting other revenue earned by your establishment.</p> <p>For others see reference list.
