Labour Force Survey - 2012

Overview	
Identification	LKA-DCS-LFS-2012-v1.0
Version	v1.0: Full edited dataset, original version for internal DPD use.
<p><u>Abstract</u></p> <p>The employment/unemployment data are required at very short intervals to monitor the program made in the employment generating policies of the government. To satisfy this need, Sri Lanka Labour Force Survey was designed as a quarterly basis survey to measure the levels and trends of employment, unemployment and labour force in Sri Lanka. Thus the survey is repeated four times each year (in most years) since the first quarter of 1990.</p> <p>Key objectives of the survey</p> <ul style="list-style-type: none"> - To study the economically active / inactive population. - To analyze employment by major industry group and employment status. - To determine unemployment rates by level of education and by age group - To study the informal sector employment. - To determine the underemployment rates by sector and by major industries <p>In January 2006, significant improvements have been made to the survey schedule in such aspects as literacy, household economic activities, informal sector employment, underemployment etc. The survey covered all 25 districts in 2012.</p>	
Unit of Analysis	Individuals from the population aged 10 years or more

Scope & Coverage	
Topics	LABOUR AND EMPLOYMENT [3]
Countries	Sri Lanka
<p><u>Geographic Coverage</u></p> <p>National coverage.</p>	
<p><u>Universe</u></p> <p>Working age population (10 years and above) living in the non-institutional households in Sri Lanka</p>	

Producers & Sponsors	
Primary Investigator(s)	Department of Census and Statistics, Ministry of Finance and Planning

Sampling
<p><u>Sampling Procedure</u></p> <p>2.1 Sampling plan and the sampling frame</p> <p>A two stage stratified sampling procedure was adopted to select a sample of 19,420 housing units to be enumerated in the survey. The master sampling frame prepared for 2011 - Census of Population and Housing was used as the sampling frame for the selection of sample for the Labour Force Survey 2012.</p> <p>2.2 Sample size</p> <p>The quarterly survey was conducted since 1990 using a sample of 2,000 housing units per quarter in areas other than North and East, and the sample size was increased to 4,000 housing units per quarter in 1996 and continued thereafter. However,</p>

in 1992 and 1997, an annual sample of 20,000 housing units was selected to give reliable district level estimates. In 2004 again 20,000 housing units were selected for the survey. However, in order to provide district level estimates precisely, it was decided to use 20,000 - 25,000 housing units as the annual sample. As such, in 2012, the annual sample of 19,420 housing units was selected.

2.3 Sample Allocation

Allocation of 19,420 Primary Sampling Units (PSU's) for the Districts and sectors were done using the Neymann Allocation procedure. In other words, the allocation of PSU's to strata was disproportionate, designed to produce estimates of acceptable reliability for each area for which separate estimates were needed. Then The District sample was equally distributed among the 12 monthly rounds. Table 1 gives the sample distributions by District for year 2012.

Table 1: Sample allocation by District - 2012.

District Units	Housing	District Units	Housing
Total	19,420	Mullaitivu	360
Colombo	1710	Kilinochchi	360
Gampaha	1670	Batticaloa	540
Kalutara	940	Ampara	610
Kandy	1,470	Trncomalee	380
Matale	410	Kurunegala	1,530
Nuwara-eliya	540	Puttalam	610
Galle	1,140	Anuradhapura	630
Matara	1,010	Polonnaruwa	430
Hambantota	770	Badulla	730
Jaffna	690	Moneragala	360
Mannar	360	Ratnapura	970
Vavuniya	390	Kegalle	810

2.4 Selection of Primary Sampling Units (PSU)

Primary sampling units are the census blocks prepared for the Census of Population and Housing - 20011. The sample frame, which is a collection of all census blocks in the domain, was used for the selection of primary sampling units. A sample of 19,420 primary sampling units was selected from the sampling frame for the 2012 labour force survey.

2.5 Selection of Secondary Sampling Units (SSU)

Secondary Sampling Units are the housing units in the selected 19,420 primary sampling units (census blocks). From each primary sampling unit 10 housing units (SSU) were selected for the survey.

Variables Description

Dataset contains 298 variable(s)

File : Personal Information

YEAR: Year

Information [Type= continuous] [Format=numeric] [Range= 2012-2012] [Missing=*]

Statistics [NW/ W] [Valid=62298 /-] [Invalid=0 /-] [Mean=2012 /-] [StdDev=0 /-]

MONTH: Month

Information [Type= continuous] [Format=numeric] [Range= 1-12] [Missing=*]

Statistics [NW/ W] [Valid=62298 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	January	0	
2	February	0	
3	March	0	
4	April	6405	10.3%
5	May	6694	10.7%
6	June	6613	10.6%
7	July	7527	12.1%
8	August	7326	11.8%
9	September	7222	11.6%
10	October	7140	11.5%
11	November	6841	11.0%
12	December	6530	10.5%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

SECTOR: Sector

Information [Type= continuous] [Format=numeric] [Range= 1-3] [Missing=*]

Statistics [NW/ W] [Valid=62298 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	Urban	10823	17.4%
2	Rural	48483	77.8%
3	Estate	2992	4.8%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

DISTRICT: District

Information [Type= continuous] [Format=numeric] [Range= 11-92] [Missing=*]

Statistics [NW/ W] [Valid=62298 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
11	Colombo	5493	11.8%
12	Gampaha	5122	11.0%
