Household Income and Expenditure Survey - 1990-1991 (HIES 1990-1991)

Overview	
Type	Income/Expenditure/Household Survey [hh/ies]
Identification	LKA-DCS-HIES-1990-1991-v1.0
Version	Production Date: 2009-02-13 v1.0: Full edited dataset, original version for internal DPD use.
Series	<p>Household Income & Expenditure Survey 1990 is the sixth in the series of surveys conducted by the Department of Census and Statistics under the National Household Survey Program.</p> <p>Income and Expenditure Survey is conducted once in every 5 years and this is the sixth in the series. The survey was conducted during the period starting from June 1990 to May 1991, in twelve monthly rounds to capture the seasonal variation of the income and expenditure pattern of the households.</p> <p>This survey provides comprehensive information on household income, individual income, household expenditure, per capita expenditure etc; which are required to study the living conditions of the different segments of the population. Additional background information on Demographic characteristics of the population was also collected.</p> <p>The data was collected by direct interviews based on a special schedule which had three sections:-</p> <ol style="list-style-type: none"> (1) Demographic characteristics (2) Household expenditure (Food and Non-food items) (3) Household income (Monetary and Non-monetary income)
<p><u>Abstract</u></p> <p>This survey provides information on household income and expenditure to be able to measure the levels and changes in the living condition of the people and to observe the consumption patterns .</p> <p>Key objectives of the survey</p> <ul style="list-style-type: none"> - To identify the income patterns in Urban, Rural and Estate Sectors & provinces. - To identify the income patterns by income levels. - Average consumption of food items and non food items - Expenditure patterns by sector and by different income levels. 	
Kind of Data	Sample survey data [ssd]
Unit of Analysis	Household, Individuals

Scope & Coverage

Scope

The scope of HIES 1990/91 includes the following key sections:-

- 1). Demographic characteristics
 - 2). Income
 - 3). Expenditure
-

Identification and demographic Information

- Address
- Province
- District
- D.S. Division
- Name of MC/UC
- G. N. Division
- Name of Village
- Name of Estate
- Primary Sample Unit Number
- Serial Number of Housing Unit
- Survey Month
- Number of households
- Name of the Head of the household
- Interviewer's & Supervising Office
- Demographic Characteristics
- Personal Information
- Individual's economic activities (for persons 10 and above)
- Total land area owned and or cultivated by any member/s of household(including boarders, lodgers and servants)

Expenditure

- Daily consumption on Food, Drink and Tobacco
(Cereals, Prepared foods, Pulses, Vegetables, Leafy Vegetables, Yams & other, Meat, Fish, Dried fish, Eggs,

Sampling**Sampling Procedure****Sample Design**

A two stage stratified random sample design was used in this survey. Each domain for which separate estimates were required was made a separate stratum. As such each sector (Urban, Rural, Estate) within each district was considered as a separate stratum.

Sample Size

In this design the first stage units (FSU) were the census blocks prepared at the 1981 Census of Population and the second stage units (SSU) were the housing units. It was decided to select 10 housing units from each selected census block. Thus, a first stage sample of about 2,500 census blocks have to be selected from the entire island.

Sample Allocation and Method of Selection

The allocation of 2,500 census blocks to each district was made proportional to the square root of the population (as at 1981 Census) in that district. These values have been rounded to multiples of twelve. (Refer page 5 of the final report attached in the external resources section)
It was decided to over sample the urban sector in each district

in comparison to the rural and estate sectors with the objective of allocating roughly by one-third of the total sample. Allocation between the rural and estate sectors in each district was proportional to 1981 population. Within each stratum, the assigned number of FSU's were selected with probability proportionate to size (using the Census or adjusted housing unit counts) with replacement.

The lists of census units prepared for the Census of Population and Housing 1981, of each selected block were updated to include new housing units and to exclude ones which are no longer in existence. This updating operation was also staggered over a period of twelve months starting from May 1990 to April 1991. For each FSU, updating was done about one month prior to the scheduled interviewing.

Deviations from Sample Design

Non-Response

Of a sample of 25080 housing units selected only 19,401 households were covered in the survey. Northern and Eastern provinces were excluded in the survey due to the prevailing conditions in the area.

Response Rate

Out of 19401 households 95 percent the households were fully completed while 0.2 percent have refused.

Sector wise completion rates show that Urban sector had 93 percent, Rural sector 96 percent and the Estate sector 97 percent.

Data Collection

Data Collection Dates	start 1990-06-01 end 1991-05-31
-----------------------	------------------------------------

Data Collection Mode	Face-to-face [f2f]
----------------------	--------------------

Data Collection Notes

Field data Collection

Data collection in the field was done by the Statistical Investigators of the Department under the direct supervision of district Statisticians/Statistical Officers.

Questionnaires

Questionnaires

The survey schedule was designed to collect data on household basis and separate schedules were used for each household (identified according to the definition of the household) within the housing units selected for the survey. The survey Schedule consists of three main sections .

1. Demographic section
2. Expenditure
3. Income

The demographic characteristics and usual activities of the inmates belonging to the household are reported in the Demographic section of the schedule and close relatives temporarily living away are also listed in the section.

Expenditure section has two sub sections to report food and non-food consumption data separately. Expenditure incurred on their own decisions by boarders and servants are recorded in the sub section under the expenditure section. The income has seven sub sections categorized according to the main sources of income.

Data Collector(s)	Department of Census and Statistics (DCS) , Ministry of Finance and Planning

Supervision

The field officers (statistical officers) were supervised by the personnel above them in the organization hierarchy such as Statisticians, Deputy Directors & Statisticians attach to the Sample Survey Division

Data Processing & Appraisal

Other Processing

Data was processed in District-wise batches and stored in separate files.

Data processing included the following steps.

1. Counting and accepting the filled questionnaires by the DP Division
2. Do a visual check for completeness
3. Preliminary editing and marking codes
4. Entry of data
5. Run edit program for each District batch
6. Produce error report and return to the Survey office
7. Correction of errors on the report
8. Change incorrect data using the corrected error report
9. Re-run the edit program and repeat the error correction procedure
10. Produce final report on clean data with a backup of clean data.

After all batches have been processed, all data files were combined together and then the following activities were done :-

- 11) Re-coding of variables needed for analysis
- 12) Adding sample weights
- 13) Tabulations

Confidentiality

Under the Statistical ordinance, micro data cannot be released with identifications for public use. Procedures are in place to ensure that information relating to any particular individual person, household or undertaking will be kept strictly confidential and will not be divulged to external parties. Information on individual or individual

Household/establishment will not be divulged or published in such a form that will facilitate the identification of any particular person or establishment as the data have been collected under the Census/Statistical ordinance, according to which the information at individual level cannot be divulged and such information is strictly confidential.

Access Conditions

The dataset has been anonymized and is available as a Public Use Dataset. It is accessible to all for statistical and research purposes only, under the following terms and conditions:

1. The data and other materials will not be redistributed or sold to other individuals, institutions, or organizations without the written agreement.
2. The data will be used for statistical and scientific research purposes only. They will be used solely for reporting of aggregated information, and not for investigation of specific individuals or organizations.
3. No attempt will be made to re-identify respondents, and no use will be made of the identity of any person or establishment discovered inadvertently.
4. No attempt will be made to produce links among datasets provided by the Department or among data from the Department and other datasets that could identify individuals or organizations.
5. Any books, articles, conference papers, theses, dissertations, reports, or other publications that employ data obtained from the Department will cite the source of data in accordance with the Citation Requirement provided with each dataset.
6. An electronic copy of all reports and publications based on the requested data will be sent to the Department

The following rules apply to micro data released by the Department of Census and Statistics.

- Only the requests of Government Institutions, Recognized Universities, Students, and selected international agencies are entertained. However, the Data users are required to strictly adhere to the terms stipulated in the agreement form.
- All the data requests should be made to Director General (DG) of the DCS as the sole authority of releasing data is vested with the DG, DCS. DCS of Sri Lanka reserves sole right to approve or reject any data request made depending on the confidential nature of the data set and intended purpose of the study or analysis.
- Requests for micro data should be made through the agreement form designed by DCS for this purpose (Form D.R.1). The agreement form should be filled in triplicate and the Study/project proposal should accompany the filled agreement form. If requests are made for the micro data of more than one survey, a separate agreement should be signed.
- If the data request is from a student a letter from the respective Dept. Head/Dean/Supervisor, recommending the issue of data, should also be accompanied.
- If the request is approved only 25% of the data file is released at the first stage. The release of the total data file is considered only after reviewing the draft report prepared on the basis of the 25% sample data file.
- The released Data file should be used only for the specific study/Analysis mentioned in the agreement form and shall not be used for any other purpose without the prior approval of the Director General of the DCS. Moreover, Copies of the micro-data file, obtained from the DCS, shall not be given to anyone else without the prior written approval of the Director General of the DCS.

- The draft report of the Study/Analysis should be submitted to the DCS and the concurrence of the DG, DCS, should be obtained before publishing it. Once published, a copy of the final report should be submitted to the DCS.
