SERIES INFORMATION

The computerization of marriage statistics is a continuous process where the event by event data are collected on a monthly basis and the final outputs (reports) are produced annually for dissemination.

Registration of vital events commenced in 1867 with the enactment of civil registration laws which conferred the legal sanction for the registration of events namely, live births, deaths, still births and marriages.

ABSTRACT

Vital Statistics cover Births, Deaths, Still births and Marriages which are called vital events. The source for the collection of data for the preparation of Vital statistics is the certificate issued to the respondent when the registration of the occurrence of the vital event is done. Maintaining Vital statistics is an Administrative record keeping operation and is a continuous process where the event by event data are collected on a monthly basis and the final outputs (reports) are produced annually for dissemination.

The computerization of vital statistics came into being after the arrival of computers to the Department of Census and Statistics in 1960's.

Registration of vital events commenced in 1867 with the enactment of civil registration laws which conferred the legal sanction for the registration of events namely, live births, deaths, still births and marriages.

DATA COLLECTION NOTES

A respondent from the general public reports the event to a local representative - (a Registrar of Births, Deaths and Marriages in the case of deaths and marriages or an officer in a public or private maternity home) and obtains a certificate from him. The Registrar/officer produces a monthly return from the vital event records (different formats for each type of event) and send it to the collection centre of the Additional District Registrar who in turn channels the returns to the Statistics Division of the Registrar General's office for data processing purposes.
