DEPARTMENT OF LABOUR

P R E F A C E

The Annual Employment Survey of Sri Lanka is being conducted annually since 1971 by the Statistics Division of the Department of Labour. This Survey was started with the objective of measuring the levels and trends of the organized sector employment of the country over a period of time. The survey covers establishments having five or more paid employees in Private Sector and semi government establishments in Public Sector. Data is collected by using the postal survey method. This is the twenty sixth report in the series and first in this millennium . Although this is a national level survey, coverage of Northern and Eastern Provinces were badly affected due to the disturbed situation in these areas.

Coverage of survey was badly affected due to the non availability of a complete list of establishments for the whole country and also the method of data collection. These factors have affected totals of the survey results, but other main findings of survey such as distribution of organized sector employment among major divisions of industries, changes of employment among major industries over the period of time and gender distribution in organized sector employment are very useful findings of survey.

Planning and the execution of the survey was done by Mr. H.D.R.G. Peiris, Statistician and the staff of the Employment Survey Unit of the Statistics Division with the assistance of Mr. D.N. Jayakodige, Senior Statistician under the guidance and directions of Mr. A. Kahanda, Deputy Director, who was responsible for the preparation of the final report.

Data processing activities of the survey was done by the Data Processing Division and the printing of cover page and final compilation of this publication was handled by the Printing Division of the Department of Census & Statistics. I extend my sincere thanks to all these officials who have contributed their services to the survey and the publication of the report.

Finally, I wish to express my great appreciation to all the employers who have responded to our request and for their co-operation for the successful completion of the survey.

ANNUAL EMPLOYMENT SURVEY – 2000

INTRODUCTION

This is the 26th publication in the series of "Annual Employment Survey" report published by the Statistics Division of the Department of Labour. First survey of this series was conducted in 1971 with the main objective of collecting employment related information in the organized sector establishments. The employment data by major industry, occupational groups and by gender from the establishments with five or more paid employees in Private Sector and the Semi-government institutions in Public Sector are covered this Survey. Although the Survey planned to cover all the establishments with five or more paid employees, the coverage of survey affected due to non availability of complete list of establishments and the high non-response rate owing to postal survey method.

Reference period for the survey was taken as last working day in the month of June of that year(2000).

ANALYSIS OF THE SURVEY RESPONSE

Altogether 9,321 establishments from private and public sectors were addressed for this survey of which 576 was closed or duplicate and 260 establishment disqualified due to less than five employees engaged or other reason. Therefore 8,485 (91%) establishments were eligible for the survey. As shown in Table I, out of 8,485 establishments, only 5,658 responded by furnishing relevant data. It shows 2,827 or 33% establishments were not responded.

TABLE I - ANALYSIS OF RESPONSE – 2000

Sector	No. of Establish-ment Addressed	No. of Estabs. Outside the Scope of the Survey			No. of eligible Estabs.	No. of Reporting Estabs.	Non Responding Estabs.

Table II shows distribution of reporting establishments and employment by districts. Total no. of establishments covered in the survey has increased from 4,897 in previous year to 5,658 year 2000 by 15.5 percent and also employment coverage increased by 15.9 percent. Out of total employment 26.8 percent is reported from Colombo District and second highest reported from Gampaha District which is 18.7 percent, from the total of 5,658 reported. Out of total reported establishments 30.5 percent or 1,727 establishments are from Colombo District and second highest no. of establishments are reported from Gampaha District.

INDEX NUMBER OF EMPLOYMENT

To monitor the employment changes, index numbers of employment were calculated in each year. Due to change of response from establishments year to year, it is not possible to use total employment to compute index number of employment. From past experience it has been evidence that the well organized establishments with larger workforce continue to response regularly over the years. Hence for the computation of index number of employment, establishments which responded over two consecutive year were matched each year. Taking year 1971 as the base year "link relative method " has been used for computation an "Index Number of Employment" for whole country as well as each industry division. These index numbers were calculated by dividing the current year employment by the previous year corresponding figure for each major industry division and then linking up by multiplying the previous year index.
