PREFACE

The Annual Employment Survey of Sri Lanka conducted by the Department of Labour has been designed to measure the levels and trends of the private sector and semi- government sector employment of the country over a period of time. This survey has been conducted annually since 1971 by the Statistics Division of the Department of Labour and this is the 33rd publication in this series. The survey covers establishments with five or more paid employees engaged in Manufacturing, Industry & Services sectors in both Private and Semi government establishments in Public sector. Limitations of this survey are coverage of survey was badly affected due to the non availability of a complete list of establishments for the whole country and also the method of data collection (postal survey method). Although this is a national level survey, coverage of Northern and Eastern provinces were not in a sufficient level of response due to the prevailing situation in this area. Distribution of Organized sector employment by major division of industry, change of employment by divisions of industry over a period of time and also gender distribution by industry are some of the major findings of the survey.

Responsibility of planning and the execution of the survey were done by U.N.S. De Silva, Statistical Officer; final data tabulation was done by Mr.P.H.J.K. Gunathilaka, Statistical Officer, and Computer based application was done by Mr.P.G.A.R. De Silva, Statistical Officer and the staff of the Statistics division with the assistance of Mr.H.D.N. Padmasiri, Statistician under the guidance and directions of Mr.R.H.S. Abeynayake, Deputy Director (Statistics) who is responsible for the preparation of the final report.

Data processing activities were handled by the Data processing Division of the Department of Census & Statistics. I extend my sincere thanks to all officers who have contributed unreservedly to this survey and publication of the report.

Finally, I express my appreciation to all employers who have responded to our request and for their co- operation for the success of this endeavor.

ANNUAL EMPLOYMENT SURVEY – 2007

INTRODUCTION

This is the 33rd publication in the series of “Annual Employment Survey” report published by the Statistics Division of the Department of Labour. First survey of this series was appeared in 1971. The main objective of the survey is to collect employment related information in the organized sector establishments in the country. The survey covers establishments with 5 or more paid employees in Private Sector and also Semi-Government Institutions in Public Sector. Coverage of the survey was affected due to the limits of postal addresses of the comprehensive list of establishments. Non responses due to heavy collection of information through post, has influenced the survey results to some extent.

Reference period for the survey was taken as last working day in the month of June of the year 2007.

ANALYSIS OF THE SURVEY RESPONSE

Table I gives the analysis of response for the year 2007. The total number of establishments addressed in 2007 was 9,714. This shows 3.2% increase in the number addressed in comparison with that of the year 2006 which amount to 9,412. In 2007 there were 918 establishments outside the scope of survey, of that 433 were closed or duplicate and 485 were nil or less than five employees. The table I further reveals that the number of eligible establishments were 8,796 of that 6,579 establishments submitted their forms which shows 11.3% increase over the previous figure of 5,909 in 2006. The corresponding responding rate for the year 2007 is 74.8%.

CHART I - NUMBER OF EMPLOYMENT BY SECTOR 1996 - 2007

INDEX NUMBER OF EMPLOYMENT

Index Numbers are widely used to monitor the trends in employment field as well as other sectors of economics. Due to high non-response from the establishment, it is very difficult to maintain a fixed list of establishments that submit the returns every year. Hence for computational purpose of index numbers, establishments which responded over to consecutive years were matched each time. Normally better organized establishments with larger employment continued to responded regularly over the years. Index numbers were calculated by dividing the employment of current year by the corresponding figure for the previous year for each major industry division and then linking up by multiplying by the previous year index.

Table IV shows the index number of employment by major industry division, sector and whole country for the period of 2004 to 2007. As given in the table all index numbers for both sectors (public and private) has increased from 86.3 to 100.4 by 16.3%. This increase was due to satisfactory coverage of the survey.
