

## CGR SEASON TICKETS (COMMUTOR JOURNEYS)

### PROCESSING PROCEDURE

The data for this job is processed and tabulations done on a quarterly basis. Hence if the tables for a particular month are required, the Master files for that month as well as the two previous months must be used as input to the programmes. For example, if tables for January 1977 are required, the Master files for the 3 months November 1976, December 1976 and January 1977 must be all used as inputs.

These 3 files should be merged together and then sorted (on columns 5-12 for table 1, and columns 1-8 for table 2) before any further processing is done. The 3 input files to the sort merge program (ie the master files for the 3 months) should not be destroyed.

#### TABLE 1.

The programmes CGRST02 and the sort on the DIST file need be done only during the 1st run. There after the sorted DIST file could be re-used as input to CGRST03 in later runs.

Apart from the sorted DIST file, the CGPPLE, the AREA NAME file, and the 3 master files (for the 3 months), all other files can be destroyed after consultation with the programmer, in charge.

#### TABLE 2.

The 3 Master files (for the 3 months) and the AREA NAME file should not be destroyed. All other files can be destroyed after consultation with the programmer in charge.

NOTE:- The AREA NAME FILE, required for processing of table 1 and table 2 are identical. Therefore only ONE AREA NAME FILE need be stored and used for both these processes.
