Sri Lanka Customs is one of the oldest Government Departments, established in the year 1806. With the introduction of Customs Ordinance, it developed into a full-fledged state organization mainly responsible for the collection of revenue and the enforcement of Customs law. The functions of Customs Department include:

- Collection of taxes, duties and other levies as imposed by the government
- Enforcement of tariff, trade and social protection policies of the state
- Ensuring flow of passenger, goods and related means of transport

Basically any type of general statistics what is published by Customs Department are released to the public. For example quantity, value and country of origin for any commodity imported or exported are released without any restriction. However Trade information of any importer or exporter are not released to a third party.

Processing of Customs Statistics is a continuous Administrative Record Keeping operation which the Data Processing Division of the Department of Census and Statistics had been handling on behalf of Sri Lanka Customs. The processed data are available in annual files (one magnetic file for each year) at the DP Division From 1974.

The customs statistics processed using the microdata are of enormous importance specially to Importers and Exporters of Sri Lanka. The data in respect of customs microdata are extracted from the Cusdec forms received by the Sri Lanka Customs as applications to transfer goods between Sri Lanka and other countries by the importers and exporters. The Cusdec form has gone through many changes with respect to the introduction/abolition of various taxes following the Government Budget directions. The microdata format, therefore has been altered to accommodate the changes whenever the need arose.
